A WORLD LEADER IN

CORE DIAGNOSTIC

INSTRUMENTS

AMERICAN DIAGNOSTIC CORPORATION

Extraordinary Tools for Exceptional Care

In the early 1980s, ADC founders Marc Blitstein and Neal Weingart shared a vision of a medical device company built on global manufacturing partnerships and vibrant domestic production. It would be a business defined by quality, made possible by great people and steadfast relationships. In the decades since, ADC's product line, customer base, and approach to manufacturing and distribution have evolved greatly. Today, we're an industry leader known for the diverse, deep, and dependable product line that's showcased in this catalog.

MANUFACTURING

ADC products enjoy a reputation for advanced design combined with skilled craftsmanship. We were an early pioneer of a global production model, sourcing components and finished goods from the world's leading ISO 13485 manufacturers – many on an exclusive basis. These single-sourced, long-term relationships ensure consistency, lot after lot, year after year. More recently, we opened our own manufacturing subsidiary in Suzhou, China, employing 80 staff.

Most of ADC's core diagnostic products are fully assembled, inspected, and packaged in our New York facility. This blend of global sourcing and domestic production allows ADC products to be priced considerably lower while maintaining the highest standards for quality.

INDUSTRY-LEADING WARRANTIES

Our commitment to manufacturing excellence is evident in our product warranties, which are among the most comprehensive in the industry. Several of our stethoscopes and manometers come with lifetime warranties.

INSPECTION, TESTING, QUALITY CONTROL

We take quality seriously and engineer it into every stage of our product life cycle. Few in the industry can match the investments we've made in this arena. Quality and sourcing offices in Ningbo, China, and Taipei, Taiwan, sample each shipment from every vendor to ensure our products meet – and often beat – the toughest national and international standards. Components are inspected again in our New York testing lab, using custom-built test machines and equipment, as are the finished instruments we assemble domestically. More about our processes is described in the product sections.

But don't just take our word for it. Compare the performance, features, and durability of any ADC product to any other on the market. Then compare the price. You'll soon discover there's simply no comparison at all!

Vital Signs Monitors

ADC's lineup includes two clinical-grade monitors for automated NIBP or vital signs: the Adview 2 Modular Diagnostic Station and the e-sphyg 3 Digital Blood Pressure Monitor. Both offer incredible feature sets with budget friendly pricing, along with a purchase and support experience that's second to none. Each features a customizable average mode and a manual mode for validating automated blood pressure readings or to help when measuring patients with arrhythmias or other complex needs. Desk, wall, and mobile platforms provide flexible solutions for every type of practice.

The Importance of Average Mode

The evidence is clear: You get more reliable blood pressure results with a series of sequential readings that are averaged into a single result. That's why both the Adview 2 and the e-sphyg 3 feature user-definable average mode technology.

Platforms for Every Practice Workflow

Both the Adview 2 and the e-sphyg 3 provide modern, compact designs that are self-standing for desktop or tabletop use, with built-in handles. Well-built, ergonomic desk, wall, and mobile options are also available to match day-to-day workflow.

Diagnostix Adstations, see page 109

Also available for the e-sphyg 3:

Build a mini vitals station with our Premium Desk Caddy

Padded Carrying Case

Modular, Multiplatform, Affordable – Evolved

*Some assembly required

9005BP BP Module | 9005BPTO BP/Temp | 9005BPS BP/SpO2 | 9005BPSTO BP/SpO2/Temp

Our truly modular design allows you to create the diagnostic station that's perfectly suited to your needs. Start with the fully featured Blood Pressure base unit and add optional Temperature and SpO2 functionality, now or in the future. Order modules at the time of purchase and we'll ship your Adview 2 configured, or add them as you need them to upgrade in the field.

Adview® 2 Modular Diagnostic Station

The world's first — and still only — truly modular diagnostic station. Now in its second generation.

The Adview® 2 features

- A flexible design with up to three modules: blood pressure, temperature, and pulse oximetry
- Clinical-grade Advantage™ BP technology from SunTech Medical®
- A proprietary manual BP mode, allowing measurement with a stethoscope using the auscultatory method
- New, customizable average mode, with setting options ranging from two to five readings and start and interval delays
- A temperature module featuring Covidien Filac™ technology, providing accurate measurement in about 10 seconds. Module comes with standard oral/axillary probe; optional rectal probe available.
- ChipOx Nellcor™ SpO_2 module, providing accurate readings in about 10 seconds. Optional pediatric sensor available.
- Contemporary, compact design with an easy-to-read LCD display and an integrated handle for portability
- Lithium ion power for longer battery life and lighter weight
- Desktop, mobile, and wall mount options
- Optional accessories, including a Wi-Fi dongle and two scanner options (linear or 2D) for uploading patient data to your facility's EMR
- Network-enabled technology with IHE HL7 messaging
- Three-year warranty on the blood pressure base unit, SpO_2 module, and temperature module; three-year warranty on cuffs; 90-day warranty on all other accessories

AMERICAN DIAGNOSTIC CORPORATION

e-sphyg 3™ Digital Blood Pressure Monitor

Our all-new, clinical-grade digital blood pressure monitor is the economical, easy-to-use solution you've been waiting for.

The e-sphyg 3 features

- Auto mode for quick readings in as little as 30 seconds
- Manual mode for auscultation with a stethoscope
- Customizable three-reading average mode with individual measurement display
- Last-reading memory
- Irregular heartbeat detection
- Oscillometric measurement with systolic and diastolic blood pressures, pulse rate, and mean arterial pressure (MAP)
- High-capacity rechargeable battery, standard
- For use with adult and pediatric patients
- Validated for pregnancy and preeclampsia
- Includes Small Adult, Adult, and Large Adult Adcuffs with exclusive Size Guide Marking System to ensure accurate readings on virtually any patient
- Desktop design is self-standing and features built-in handle; or choose optional desk, wall, or mobile platforms for added versatility in any practice
- Three-year warranty on unit and cuffs; one-year warranty on battery and accessories

Fingertip Pulse Oximetry

Carry lanyards and batteries included with all models.

ADC's line of fingertip pulse oximeters spans a range of price points with solutions for both adult and pediatric patients. All styles combine the finger sensor probe, electronics, and display screen in a compact, well-designed housing, providing spot SpO2 and heart rate readings in just a few seconds.

The fully featured 2100 and 2150 are designed for professional use. Both models offer a two-color OLED display, six display orientations, multiple brightness settings, graphical display of pulse wave form, and rubberized protective bumper sleeve. The value-priced 2200 features a one-color LED display, pulse strength indicator, and two display orientations.

Diagnostix™ 2100 Digital Fingertip Pulse Oximeter

A portable, feature-rich pulse oximeter that provides spot readings of SpO_2 and heart rate for the busy healthcare professional.

2100

The 2100 features

- SpO_2 and pulse rate readings
- Accuracy: SpO_2 ±3% / HR ±2 BPM
- Six changeable display modes
- 10 display brightness settings
- Visual and audible indicators
- 25% smaller than competing models
- Fits fingers with a thickness of .31" to .79" (8mm to 20mm)
- Dual-color OLED display
- Secure, hinged battery cover
- Carry lanyard and black or orange rubberized bumper included
- Two AAA batteries
- Instruction booklet
- Two-year limited warranty

CATEGORY SPOTLIGHT

Aneroid Sphygmomanometers

Mechanical blood pressure is ADC's biggest product category. We are the largest privately held manufacturer of sphygs by unit volume in the United States – larger than the next three competitors combined – and the largest private label supplier.

Our **Diagnostix** and **Prosphyg** brand components, and private label versions, are made exclusively for ADC by the world's best contract manufacturers. **Sphygs are then inspected, assembled, and packaged in New York**. We subject every single gauge to 100% visual inspection for zero point and test up to 15% for accuracy. A random sample from every batch is subjected to a destructive endurance test, putting them through 30,000 inflation cycles: three times the requirements under ANSI/AAMI/ISO 81060-1.

At the heart of every ADC aneroid is **a movement assembled under optimum conditions** to ensure it is free of the contamination found in lesser-built competitive instruments. The precision-crafted movement is heat treated and pre-aged to eliminate hysteresis, the stretching that often plagues cheaper products and knocks them out of calibration early in their life. The basic movement is optimized for each of the various models we produce.

DOMESTIC ASSEMBLY and INSPECTION

We assemble every manual sphyg (unless otherwise noted) in our New York facility. Our assemblers are thoroughly trained and empowered to reject non-conforming parts during the manufacturing process. Final Quality Control with lot coding ensures the instrument you receive will work perfectly.

ADC is classified by the FDA as a true manufacturer, holding many of our own 510(k) premarket approvals

We produce three types of aneroid instruments: pocket, one-handed palm, and clock. With 35 models and hundreds of model options, there's a solution for every price point, budget, or clinical need.

POCKET GAUGES

Pocket gauges are our most popular design. Die-cast zinc housings are heat treated, to minimize the impact of ambient temperature variations, then meticulously finished in a baked enamel or a chrome plate. **Movements are carefully mounted and tested repeatedly**. Scale plates are serialized with a code that allows us to identify the production lot. From our basic 809 series manometer to our top-of-the-line 800-series, each model provides a unique feature set that differentiates it from competing models.

Our feature-rich 800-series manometer, used in our premium 700-series pocket aneroid, boasts a chrome-plated housing polished to a sterling shine, an extended scale plate to eliminate parallax error, a luminescent dial, and a lifetime calibration warranty.

PALM GAUGE

Our palm gauge incorporates the gauge, bulb, and valve into a single assembly, making it more convenient to use, particularly in multicuff solutions. To help isolate its premium movement from the vibration that often disables lesser-built instruments, the 804N's **movement is housed in a zinc cage** suspended within an impact-resistant ABS polymer shell that acts as a shock absorber. And while most palm-style manometers utilize a traditional thumbscrew valve that is often difficult to control, our 804N manometer features a **two-position trigger air-release valve**, with infinite control in deflation mode and rapid exhaust when locked in the open position. And because it's centrally positioned behind the manometer (rather than to one side), it allows for ambidextrous use.

CLOCK ANEROID

ADC's clock aneroid is available in wall, desk and mobile platforms. The clock aneroid features a **more robust spring** to handle the heavier weight of the indicator needle and a **special internal air restrictor** to reduce "needle bounce" that causes lesser-built clock models to lose calibration prematurely. The specially designed lens cover mounting system prevents dust from entering the manometer and contaminating the movement. Luminescent beveled dial is easy to read in virtually all light conditions.

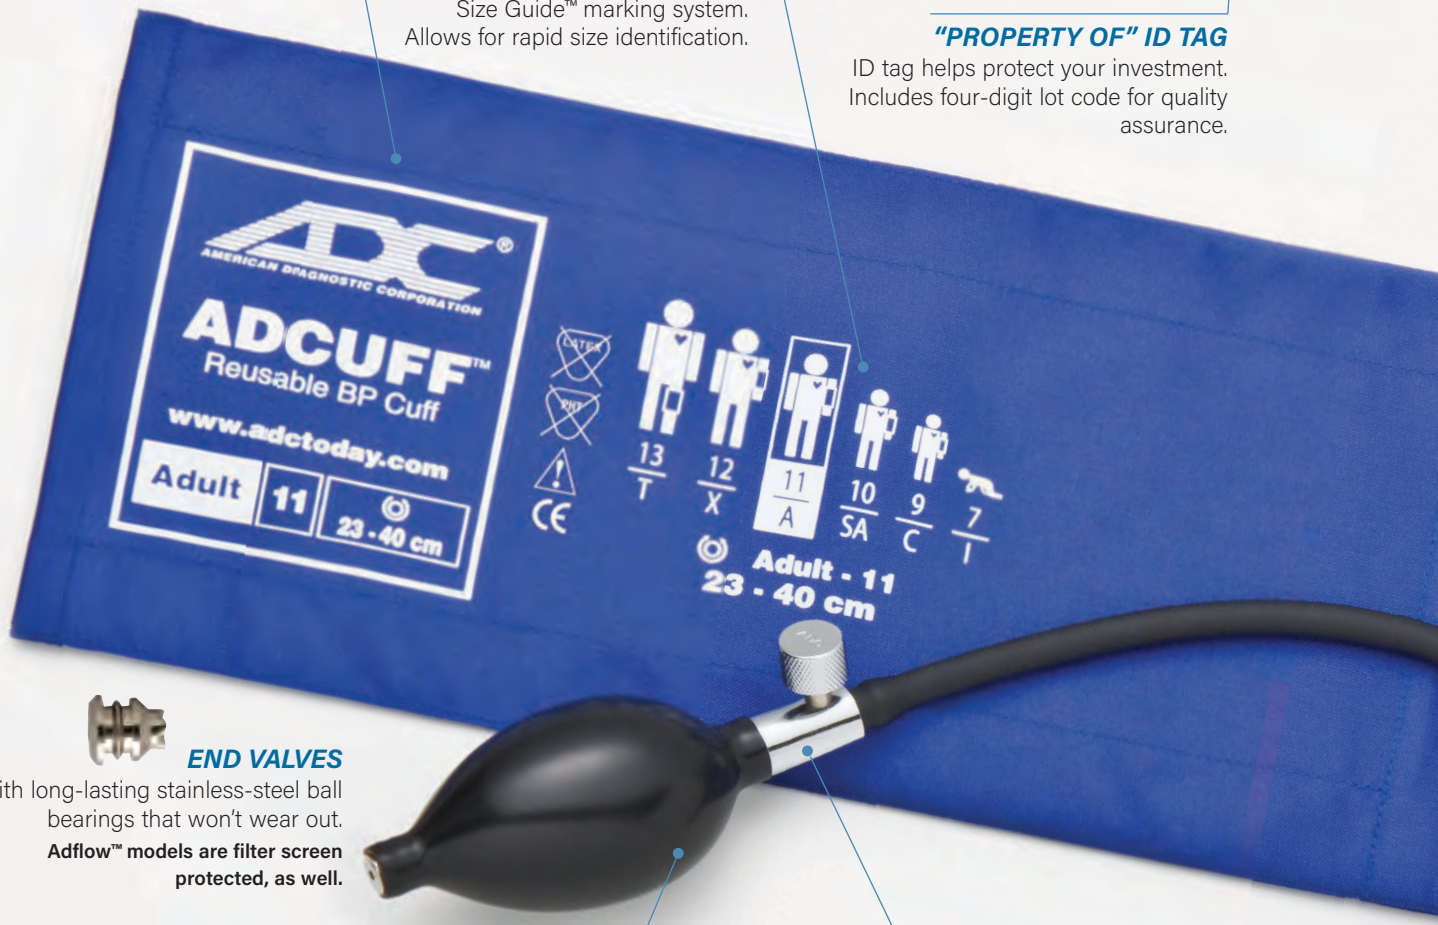
AMERICAN DIAGNOSTIC CORPORATION

The Adcuff Inflation System

210 DENIER NYLON
With nylon thread, sewn with 11 threads per inch. It's durable, comfortable, and easy to clean.

SIZE ICONS
Part of the Adcuff's proprietary Size Guide™ marking system. Allows for rapid size identification.

"PROPERTY OF" ID TAG
ID tag helps protect your investment. Includes four-digit lot code for quality assurance.



END VALVES
With long-lasting stainless-steel ball bearings that won't wear out.
Adflow™ models are filter screen protected, as well.

INFLATION BULBS
In either neoprene (Diagnostix™ models) or PVC (Prosphyg™ models), made without natural rubber latex or phthalates.

STANDARD and FILTER SCREEN PROTECTED VALVES
Choice of standard or premium Adflow™ filter screen protected valves with proprietary micro-threading for precise deflation control. All valves are held to leakage standards 33% more stringent than ANSI standards require.

QUALITY CONTROL and TESTING
Adcuff components undergo multiple rounds of proprietary testing in our New York lab to ensure our products meet or exceed NIST standards. Tests include hook-and-loop adhesive durability, bladder leakage, and valve leakage.

Adflow™ Valve

Standard Valve

ADCUFF™ +

Our all-new line of one-piece reusable blood pressure cuffs designed for accuracy, comfort, and ease of use. Featuring a convertible design for use with single- or double-tube systems.

ADCUFF+™ option NOW available

Look for this symbol for sphyg models that offer an Adcuff+ option

GAUGE HANG TAB
(Hidden from view)
Allows convenient use with any type of pocket aneroid.

HOOK-and-LOOP ADHESIVE
Rated to a minimum of 30,000 open/close cycles and repeatedly tested to 50,000.

INDEX and RANGE MARKINGS
Part of the Adcuff's proprietary Size Guide™ marking system, they facilitate the selection of the appropriate cuff and prevent miscuffing.

BLADDER FLAP
Secures bladder, prevents bulging.

PROPERLY POSITIONED ARTERY MARK
(You'd be surprised how many aren't)
Printed on both inside and outside cuff surfaces to simplify cuff positioning.

PROPRIETARY CONVERTIBLE BLADDER

Our Adcuff bladder design allows us to reduce the number of components by nearly 60%, ensuring virtually 100% fill rates no matter how big the demand.

Each is specially formulated and made without natural rubber latex or phthalates. Bladders are RF welded and tested to 50,000 cycles and 100% individually leak tested at the factory to ensure day-in and day-out dependability. Now made with TPU for a 98% improvement in weld strength.

AMERICAN DIAGNOSTIC CORPORATION

e-sphyg Digital Aneroid

Manometer can be purchased separately or as a complete sphyg (see page 45 for gauge only)

Compatible with virtually any cuff on the market

ADC's e-sphyg™ is a revolutionary digital aneroid sphygmomanometer that replaces a gauge's vulnerable mechanical movement with virtually indestructible digital circuitry.

The instrument still uses traditional auscultatory measurement, the technique trusted by healthcare professionals for well over a century. But instead of pairing with an analog gauge or a potentially dangerous mercury-filled instrument, the practitioner's stethoscope is paired with a digital manometer featuring a bright, backlit LCD display and a splash- and shock-resistant housing that's virtually unbreakable. Stethoscope sold separately.

Life

Our lifetime calibration warranty is so comprehensive that if the device ever needs service we will repair or replace it free of charge.

Stethoscope Required

e-sphyg™

The world's first digital aneroid sphygmomanometer.

The e-sphyg™ features

- Virtually indestructible design can withstand repeated drops of five feet or more
- Splash-resistant housing for use in harsh environments
- Swivel cuff clip allows the manometer to be repositioned for easy viewing
- Auto-off function conserves battery strength
- Dual low-battery warnings
- Recalibration reminder after 10,000 cycles (free lifetime recalibration)
- Systolic assist alerts practitioner to the onset of Korotkoff sounds – makes a great training aid
- Deflation-rate display promotes proper technique in accordance with AHA guidelines
- Pulse-rate display at completion of measurement
- Manometer works with virtually every cuff on the market
- Requires familiar and trusted manual auscultation (use of stethoscope) to obtain blood pressure readings
- Two AAA batteries (included)
- May be ordered as a complete sphygmomanometer featuring nylon Adcuff™ inflation system or gauge only for use with existing inflation systems (see page 43 for e-sphyg™ manometer)
- Lifetime calibration warranty

Diagnostix™ 700 Series

Our finest pocket aneroid, the 700 is the instrument of choice for the discriminating professional.

Extended scaleplate graduation marks reduce parallax for clear viewing from any angle.

Precision-crafted, Japanese-engineered manometer movement tested to 30,000 cycles.

The 700 series features

- Chrome-plated, precision-crafted 300mmHg manometer; exceeds ANSI/AAMI/ISO 81060-1 specifications for accuracy and is backed by a lifetime calibration warranty
- Luminescent dial features bold numerals and extended graduation marks for easy reading in all light conditions and from virtually any angle
- Adcuff™ nylon cuff with ADC's proprietary Size Guide™ marking system prevents miscuffing
- Adflow™ filter screen check and deflation valves reduce dust buildup
- Adflow™ chrome-plated brass air-release valve with micro-threads for precise deflation control
- Leatherette carry case with durable nylon zipper
- Assembled, inspected, and packaged in the USA from foreign components

Pro's Combos

Looking for a scaled-down set without a stethoscope?

Our Pro's Combo II can be purchased with just the aneroid and matching case. **See page 28.**

Pro's Combo II and V offer deluxe gift-box packaging!

ADC's Pro's Combos combine our most popular aneroid blood pressure instruments and best-selling stethoscopes in a premium, color-coordinated carry case. Choose from five distinct models.

- **Pro's Combo I Palm Aneroid Kit** (Model 788). Ideal for the pre-hospital professional, this model marries our virtually indestructible 703 series palm aneroid with an Adscope Sprague stethoscope.
- **Pro's Combo III Pocket Aneroid** (Model 778). For the discriminating professional who prefers a more traditional design, this model features the 700 series chrome-plated aneroid paired with an Adscope 603 dual-head clinician stethoscope.
- **Pro's Combo V Pocket Aneroid Kit** (Model 728). This combination starts with our 720 pocket aneroid, and includes our Adscope Lite 619 dual-head clinician stethoscope.
- **Pro's Combo II Pocket Aneroid Kit** (Model 768). Our original combo set is built with ADC's best-selling 760 aneroid and your choice of a lightweight Proscope or Adscope Sprague.
- **Pro's Combo IV Pocket Aneroid Kit** (Model 769). This style includes our best-selling 760 aneroid and an Adscope Sprague with additional instruments in a heavy-duty, color-matched nylon fanny pack.

ADCUFF+™ option NOW available

Multicuff Systems

Single color cuffs and multi-color models available.

Offered in infant, child, and adult sizes.

ADC's multicuff blood pressure systems combine versatility, convenience, and value. Each set includes a palm aneroid gauge, a range of cuff sizes, and compartmentalized storage solutions optimized for both in-office and on-the-go environments.

At the heart of every multicuff system is our 804N palm aneroid. With its protective zinc cage, high-impact ABS housing, ambidextrous infinite-control air-release valve, and a precision-crafted, Japanese-engineered movement tested to 30,000 cycles, the 804N is the finest palm-style manometer available.

Sets come with 3, 4, or 5 blood pressure cuffs, all featuring the ADC Adcuff proprietary Size Guide™ marking system. Select models are also available with our new one-piece bladderless Adcuff+ cuffs. Sizes range from Infant to Large Adult and Thigh.

AMERICAN DIAGNOSTIC CORPORATION

Clock Face Aneroids

ADC's clock aneroid is built with a special internal air restrictor to reduce the "needle bounce" that can cause lesser-built models to lose calibration.

ADC's Diagnostix brand clock face aneroid is the ideal blood pressure monitoring instrument for institutional use. Newly restyled, the gauge features a high-impact housing that protects the movement, with a dove-white bezel around the crystal for a more finished look.

- **Six-inch luminescent beveled dial is easy to read, even in low-light conditions**
- **Generous coiled tubing extends to eight feet in length**
- **Adcuff blood pressure cuffs available in six clinical sizes**
- **Three-year inflation system warranty**
- **Lifetime calibration warranty**

ADCUFF+™ option NOW available

Select models are available with our new one-piece bladderless cuffs.

Look for a **+** symbol in the ordering table on page 35.

Wall mount, desk stand, and mobile configurations available.

New Integrated Basket
Our newly redesigned storage basket with integrated keeps cuffs and cords neat when not in use, while allowing 110° rotation for optimal viewing. Included on wall, Adstation, and desk models.

AMERICAN DIAGNOSTIC CORPORATION

Home Blood Pressure

Smart Logic™ technology, available on many Advantage home blood pressure monitors, sets the ideal inflation level automatically.

ADC offers home blood pressure units under both our Prosphyg™ and our Advantage™ brands.

Our feature-rich mechanical and digital **Advantage** blood pressure monitors are offered in manual, upper-arm digital, and wrist digital models. Digital units feature extra-large displays, blood pressure and pulse measurement, auto off, and memory. All are made without natural rubber latex or phthalates, and all offer a five-year warranty.

Prosphyg aneroid home kits are assembled in the U.S.A. and use many of the same components found in our professional-grade products. Choose from three models, each in three sizes, and each with a 5- or 10-year calibration warranty.

The Advantage Connect 6024N combines best-in class features with Bluetooth connectivity and our free ADC@Home App. See page 37.

Advantage™ Connect 6024N

ADC's all-new Advantage Connect 6024N is an upper-arm digital home blood pressure monitor that combines best-in-class features with Bluetooth connectivity.

The 6024N features

- Systolic pressure, diastolic pressure, and pulse readings
- Wireless Bluetooth connectivity allows you to pair the unit with our free ADC@Home App and seamlessly transfer data and readings to your smartphone or hand-held device
- Measurement performed on inflation for faster, more comfortable readings
- British Hypertension Society (BHS) AA rating* ensure accuracy
- MAM Advantage™ mode automatically averages three readings for superior reporting accuracy
- Irregular heartbeat detection offers warning signal at the appearance of an irregular heartbeat
- Traffic light indicator visualizes readings against national standards
- Displays AM and PM readings separately to help detect morning hypertension
- Advanced two-zone memory with date and time stamp recalls last 99 readings for two users

*On equivalent model

- Soft, self-adjusting, wide-range D-bar cuff (Adult) fits arm ranges from 8.7'' to 16.5'' (22 cm to 42 cm)
- Auto-off to conserve batteries; four AAA batteries included
- Meets or exceeds EN 1060-1, EN 1060-3, and EN 1060-4
- 5-year warranty

Pair with our proprietary ADC@Home™ app, available at no cost from the Apple® App Store® and Google Play™ store, to:

- Capture, graph, and store blood pressure readings over time
- Visually compare readings with American Heart Association guidelines
- Share readings via email with your healthcare providers
- Set daily reading reminders
- Integrate your data with other health apps

AMERICAN DIAGNOSTIC CORPORATION

SPU Cuffs and Accessories

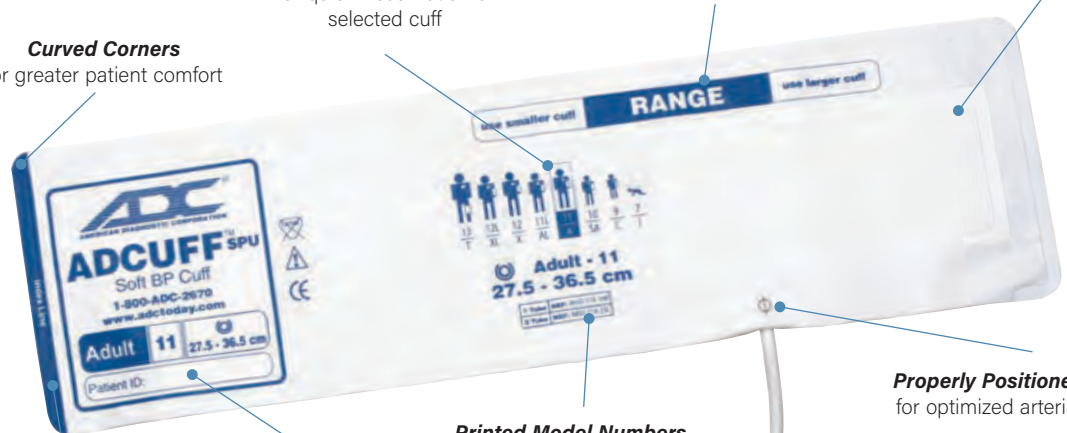
ADC's Adcuff™ SPU series of single patient-use blood pressure cuffs offers increased simplicity, accuracy, comfort, and value.

Made from a woven polyester fabric (without natural rubber latex or phthalates), the color-coded cuffs are exceptionally soft and comfortable.

Choose from a one-tube configuration with a bayonet connector or a two-tube configuration with a screw connector.

Adcuff SPU cuffs are available in adult, child, and neonatal sizes and are 100% leak tested to assure dependability.

Standardized adapters simplify purchasing and inventory management while ensuring compatibility with most monitors.
See page 48.



Strong Hook-and-Loop Adhesive
withstands repeated open/close cycles

Range Markings
for accurate sizing, minimizes risk of miscuffing

Size Icons and Color Coding
for quick visualization of selected cuff

Curved Corners
for greater patient comfort

Properly Positioned Artery Mark
for optimized arterial compression

Printed Model Numbers
simplify stock control and reordering

Index Line
for accurate sizing, minimizes risk of miscuffing

Cuff ID Panel
provides vital cuff information at a glance

See page 21 for our Prosphyg 774 SPU, a complete disposable sphyg

Adcuff™ SPU Blood Pressure Cuffs

Our line of SPU cuffs are economical enough for single-patient application yet durable enough for repeated use.

- 100% leak tested to assure dependability
- Thirteen clinical sizes for neonatal, child, and adult patients
- The industry's most precise cuff markings
- Rounded corners and soft, woven construction
- Color-coded for quick visualization of correct size
- One-tube with bayonet-type (HP) connector
- Two-tube with screw-type (Dinamap) connector
- Neonatal cuffs with Luer connector
- Standardized connectors for inventory management
- Compatible with most brands of monitors

Adcuff+ Cuffs

Our all-new line of one-piece, reusable blood pressure cuffs is designed for measurement accuracy, patient comfort, and practitioner ease.

- Bladderless design is simple to use and easy to clean
- Our most comprehensive Size Guide marking system features three different indicators (color coding, size icons, and cm range) for rapid identification of correct cuff size
- Convertible design for use with single- or double-tube systems
- Hook-and-loop adhesive rated for tens of thousands of cycles
- Gauge hang tab (on most sizes) compatible with conventional pocket aneroids
- Surface mounted tube ports permit a more uniform fit around patient limb
- Not made with natural rubber latex or phthalates
- Three-year warranty

Adcuff+ Inflation Systems

- Includes ADC's exclusive Adcuff+ one-piece bladderless nylon cuff featuring the Size Guide™ marking system
- One 50cm tube and one 25cm tube
- Adflow™ bulb and valve (872N) with filter-screen protection
- For use with most aneroid or mercurial blood pressure instruments
- Available in six sizes
- Individually packaged
- Three-year warranty
- Bayonet connector (8974M) included

Adcuff™ Inflation Systems

- Includes ADC's exclusive Adcuff™ nylon cuff (830 series) featuring the Size Guide™ marking system
- One 50cm tube and one 25cm tube
- Adflow™ bulb and valve (872N) with filter-screen protection
- For use with most aneroid or mercurial blood pressure instruments
- Available in six sizes
- Adult size available in 17 color options
- Individually packaged
- Three-year warranty
- Bayonet connector (8974M) included

Adapters

Our new adapters provide a simple method of standardizing cuff purchases across your entire institution. Just identify the type of connector currently on your monitor and match it to our one-tube or two-tube adapter solution. Common configurations are shown below; custom options are also available.

For 1-Tube Monitors

With a Male Marquette Connector		
1-Tube Cuff		**HPF-S-MQF** Bayonet (HP) Female to Marquette Female
2-Tube Cuff		**SCF2-Y-MQF** Screw (Dinamap) Female to Marquette Female
With a Female Screw (Dinamap) Connector		
1-Tube Cuff		**HPF-S-SCM** Bayonet (HP) Female to Screw (Dinamap) Male
2-Tube Cuff		**SCF2-Y-HPM** Screw (Dinamap) Female to Bayonet (HP) Male
With a Different Type of Connector		
1-Tube Cuff		**HPF-S-N** Bayonet (HP) Female to customizable open end
2-Tube Cuff		**SCF2-Y-N** Screw (Dinamap) Female to customizable open end

For 2-Tube Monitors

With Male Marquette Connectors		
2-Tube Cuff		**SCF-S2-MQF** Screw (Dinamap) Female to Marquette Female
With Female Bayonet (HP) Connectors		
2-Tube Cuff		**SCF-S2-HPM** Screw (Dinamap) Female to Bayonet (HP) Male
With a Different Type of Connector		
2-Tube Cuff		**SCF-S2-N** Screw (Dinamap) Female to customizable open end

Connectors

- Permit quick connection of various inflation systems or components
- Available in a variety of configurations and materials

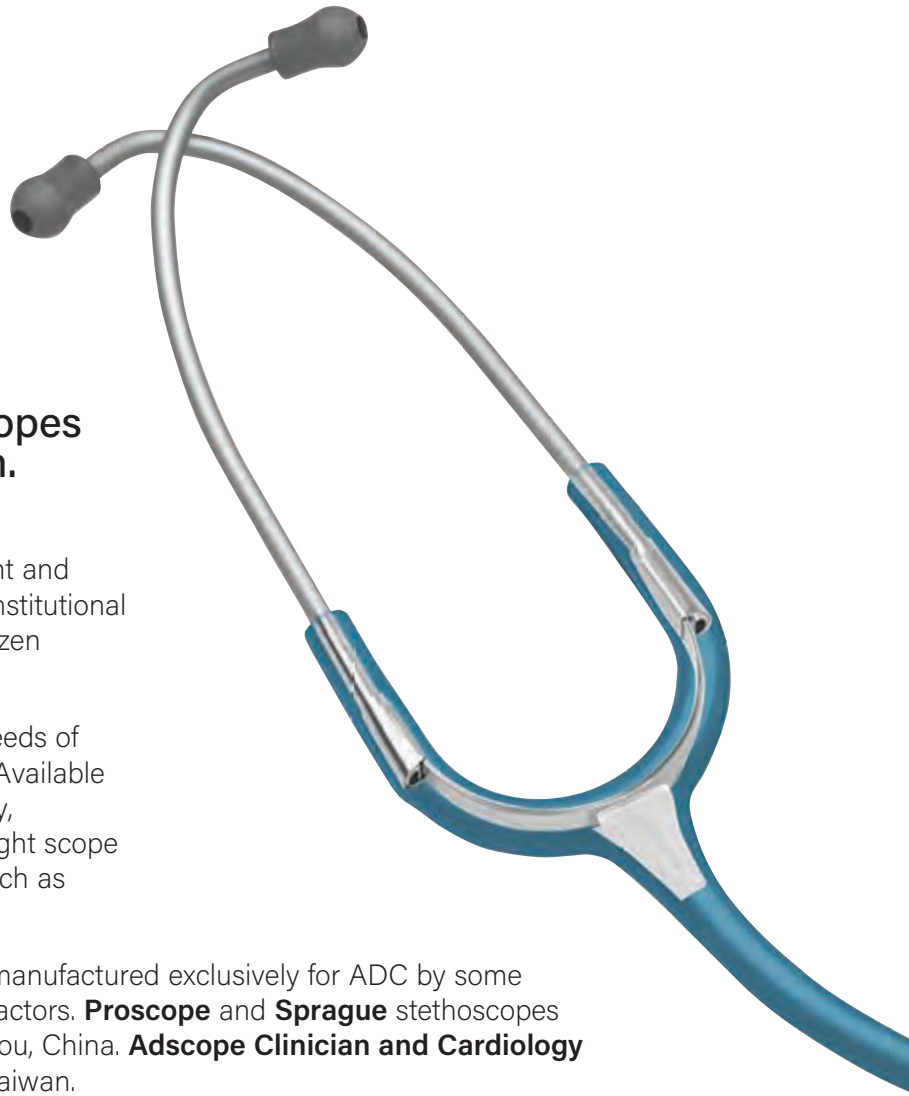
CATEGORY SPOTLIGHT

Stethoscopes



ADC builds more stethoscopes than any other U.S. firm.

Proscopes™ are ideal for general assessment and blood pressure measurement. Primarily for institutional use, these are available in more than half dozen models in hundreds of model options.

Our premium **Adscope**® brand meets the needs of today's demanding healthcare professional. Available in more than 12 models, including Cardiology, Clinician, and Sprague styles, we have the right scope for every application– at pricing that's as much as 40% less than other brands.

ADC scopes and components are contract manufactured exclusively for ADC by some of the world's leading ISO-certified subcontractors. **Proscope** and **Sprague** stethoscopes are manufactured in our own facility in Suzhou, China. **Adscope Clinician and Cardiology** components are contract manufactured in Taiwan.

All ADC stethoscopes are subjected to a variety of proprietary tests to ensure they meet our demanding standards and our customers' expectations. Dimensional tests ensure that each component is machined and molded to spec. A torque tester ensures that models equipped with adjustable binaurals and dual-head chestpieces perform consistently, lot after lot.

Our custom-made, acoustic-test machine ensures that each model performs to spec. Acoustic transfer is tested on a random sample from each production lot – whether it's a $3 disposable stethoscope or a $200 cardiology model.

Adscope Clinician and Cardiology are inspected, assembled and 100% individually acoustically tested in in New York.

adscope® Cardiology & Clinician

Adscope chestpieces are CNC machined to precise tolerances from premium metals like aluminum alloy or surgical stainless steel – all to provide remarkably consistent acoustic transfer performance, lot after lot. Combination models also feature an acoustically precise valve stem to eliminate acoustic leakage.

We offer two types of internal spring binaural/tubing assemblies on our premium Adscopes. Both feature the headset fixed at 15° forward for an anatomically correct fit and improved acoustic seal. Cardiology models feature a bi-lumen design for improved stereo separation of the channels. Clinician models feature a single lumen with reinforcing yoke for great sound and improved durability.

Aural tubes are machined from either lightweight aluminum alloy or special stainless steel that's up to 30% lighter, offering improved ergonomics and comfort. The concealed tensioning spring is tested up to 100,000 cycles to ensure a lifetime of use.

Adsoft™ Plus snap-on silicone eartips provide the ultimate in wearer comfort and acoustic seal.

And every Adscope Clinician and Cardiology is individually acoustic tested in our New York quality lab.

Hear enhanced high- and low-frequency body sounds with Adjustable Frequency Design (AFD) diaphragms

Our proprietary gasketed diaphragms work with the chestpiece to focus specific body sounds, simply by altering pressure. Use light pressure for lower, bell-type frequencies and firm pressure for enhanced higher, diaphragm-type frequencies.

ADC stethoscopes are offered in hundreds of colors and finish combinations. Options are shown on each model page and on our web site at **www.adctoday.com/colorchart.**

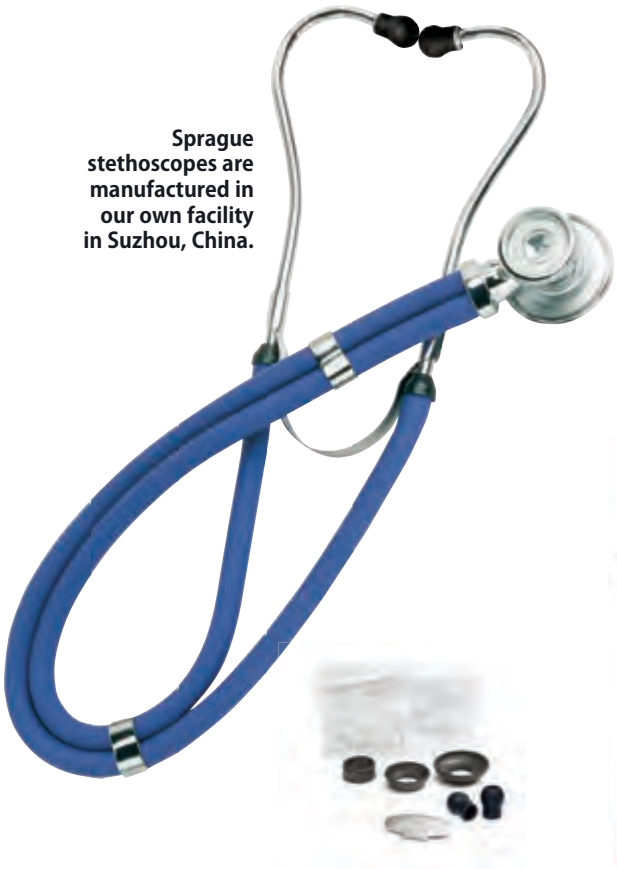
adscope LE

Adscope LE is our collection of specially curated, limited-edition printed stethoscopes. Prints are offered in three clinician models: 603, 608, and 615. Some styles are also available with a Rose Gold or Tactical finish.

learn more: www.adctoday.com/AdscopeLE



Sprague stethoscopes are manufactured in our own facility in Suzhou, China.

adscope® SPRAGUE

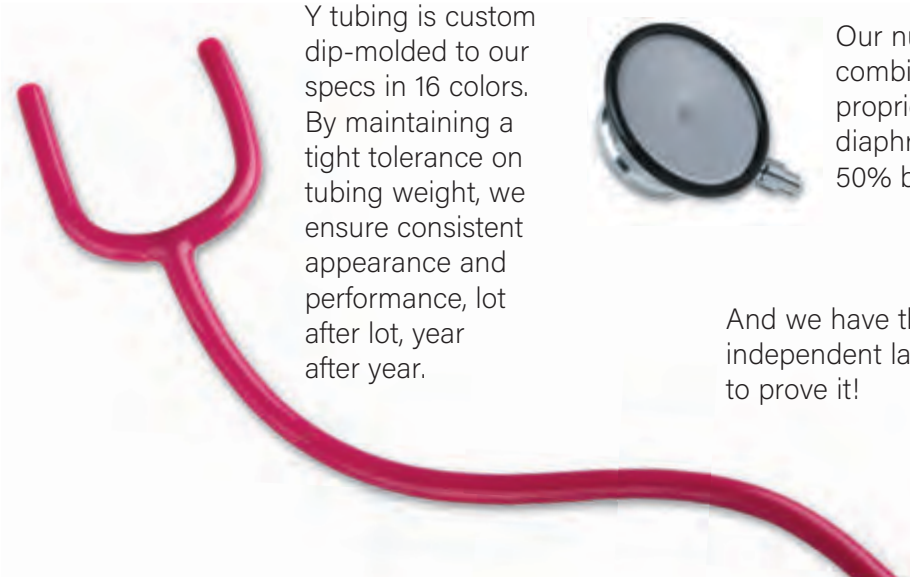
Although the Sprague scope is an industry standard offered by a number of importers, only ADC's Adscope® Sprague offers a unique combination of patented and proprietary features that distinguish it from the competition.

Our patented valve mechanism virtually eliminates acoustic leakage. Our gasketed chestpiece drum does double duty improving both chestpiece acoustic seal and the security of the various chestpiece fittings.

Finally, our unique chestpiece "key" allows the diaphragms to be more easily serviced. Each Sprague is inspected prior to packaging in our New York facility. Every single one.

proscope™ *General Exam* STETHOSCOPE

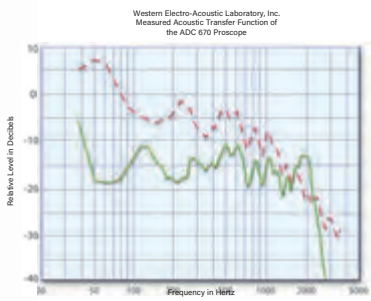
Proscope stethoscopes are manufactured in our own facility in Suzhou, China. Binaurals for our Proscope styles – Bowles type, diaphragm only, dual head, pediatric, and infant – are machined from lightweight aluminum tube stock then anodized for a durable finish.



Y tubing is custom dip-molded to our specs in 16 colors. By maintaining a tight tolerance on tubing weight, we ensure consistent appearance and performance, lot after lot, year after year.

Our nurse-style, diaphragm-only and combination dual-head chestpieces use a proprietary snap-on rim and PVC-contoured diaphragm for acoustic performance up to 50% better than competing brands.

And we have the independent lab tests to prove it!



Cardiology Stethoscopes

Adscope cardiology stethoscopes stand head-to-head with the best. We offer four models: A platinum design featuring a diaphragm-only chestpiece with AFD Technology and convertible, traditional, and lightweight combination diaphragm and bell designs.

- Lifetime warranty and free parts forever
- Assembled, inspected, and packaged in the U.S.A.
- Individually acoustic tested in New York See page 52

Adscope® 600 Platinum Cardiology

Superior acoustic performance with sculpted, single-sided chestpiece.

Overall Length: 27"
Standard Weight: 7.2 oz (203 g)*

PLATINUM-STYLE CHESTPIECE
- Sculpted, one-sided chestpiece for everyday convenience
- AFD diaphragm technology for the acoustic response of a traditional bell and diaphragm; use light pressure for low, bell-type frequency or firm pressure for high, diaphragm-type frequency
- CNC machined to exacting tolerances from surgical stainless steel for performance, durability, and comfort
- Lifetime warranty and free parts forever

CARDIOLOGY HEADSET
- Large-bore stainless-steel binaurals* fixed at a 15° angle to maximize comfort and acoustic seal
- Bi-lumen (dual channel) construction optimizes acoustic pathway
- PVC tubing is made without latex or phthalates and stays soft and flexible
- Adsoft™ Plus snap-on silicone eartips (includes both small and large) for exceptional comfort and fit

ALSO INCLUDES
- Non-chill diaphragm retaining rim for patient comfort
- Accessory kit with additional eartips and scope ID tag

THE ADC ADVANTAGE
- Assembled, inspected, and packaged in the USA
- Individually acoustic tested in the USA
- Lifetime warranty and free parts forever

* Weight may vary depending on finish.
Some special finishes have aluminum binaurals.

AMERICAN DIAGNOSTIC CORPORATION

See page 52

Adscope® 601 Convertible Cardiology

Superior acoustic performance plus versatile, convertible bell and pediatric diaphragm.

Overall Length: 28”
Standard Weight: 7.6 oz (215 g)*

CONVERTIBLE CHESTPIECE

- Convertible chestpiece offers adult diaphragm and bell or adult and pediatric diaphragm configurations
- AFD technology for both adult and pediatric diaphragms; use light pressure for low, bell-type frequency or firm pressure for high, diaphragm-type frequency
- Extra-deep bell for unsurpassed low-frequency response
- CNC machined to exacting tolerances from surgical stainless steel for performance, durability, and comfort

CARDIOLOGY HEADSET

- Large-bore stainless-steel binaurals* fixed at a 15° angle to maximize comfort and acoustic seal
- Bi-lumen (dual channel) construction optimizes acoustic pathway
- PVC tubing is made without latex or phthalates and stays soft and flexible
- Adsoft™ Plus snap-on silicone eartips (includes both small and large) for exceptional comfort and fit

ALSO INCLUDES

- Non-chill diaphragm retaining rim for patient comfort
- Accessory kit with additional eartips and scope ID tag

THE ADC ADVANTAGE

- Assembled, inspected, and packaged in the USA
- Individually acoustic tested in the USA
- Lifetime warranty and free parts forever

*Weight with pediatric diaphragm is 8.6 oz (243 g). Weight may vary depending on finish. Some special finishes have aluminum binaurals.

Adscope® Lite 619 Clinician

Exceptional acoustic performance with lightweight diaphragm and bell design.

Overall Length: 30”
Standard Weight: 3.7 oz (105 g)*

COMBINATION CHESTPIECE
- Adult diaphragm with AFD technology for tunable acoustic response; use light pressure for low, bell-type frequency or firm pressure for high, diaphragm-type frequency
- Extra-large bell for low-frequency response
- Machined from lightweight aluminum for outstanding performance and lightweight comfort

CLINICIAN HEADSET
- Lightweight aluminum binaurals fixed at a 15° angle to maximize comfort and acoustic seal
- Single lumen construction with reinforcing yoke molded into tubing
- PVC tubing is made without latex or phthalates and stays soft and flexible
- Adsoft™ Plus snap-on silicone eartips (includes both small and large) for exceptional comfort and fit

ALSO INCLUDES
- Non-chill diaphragm retaining rim for patient comfort
- Accessory kit with additional eartips and scope ID tag

THE ADC ADVANTAGE

Pediatric Stethoscopes

ADC's pediatric Adscopes are designed for practitioners who work with the smallest patients.
The instruments are scaled in size but offer a fully professional build quality, performance, and value.
Choose from four different models, two with a traditional dual-head diaphragm and bell chestpiece and two with a single-sided chestpiece that combines the bell and diaphragm, virtually eliminating a primary source of acoustic leakage.

- Lifetime warranty and free parts forever
- Assembled, inspected, and packaged in the U.S.A.
- Individually acoustic tested in New York See page 52
- AFD Technology See page 52

Headset Construction

Adsoft Plus snap-on silicone eartips (small and large) for exceptional comfort and fit

Stainless-steel binaurals fixed at a 15° angle to ensure tight acoustic seal

Single lumen construction with reinforcing yoke molded into tubing

PVC tubing made without latex or phthalates and stays soft and flexible

AMERICAN DIAGNOSTIC CORPORATION

Adscope® Sprague Stethoscopes

Sprague stethoscopes are manufactured in our own facility in Suzhou, China.

The legendary design features of the Sprague have made it one of the most popular stethoscopes in history. It offers the perfect blend of acoustic sensitivity and professional versatility and has been an EMS and nursing favorite for years.

ADC's Adscope Sprague incorporates features found on no other model on the market, like a proprietary, patented valve mechanism that virtually eliminates acoustic leakage. The result is a Sprague that outperforms and outlasts the competition.

Traditional 2-Tube and Lightweight Single-Tube Designs

Institutional Proscopes

One-year warranty

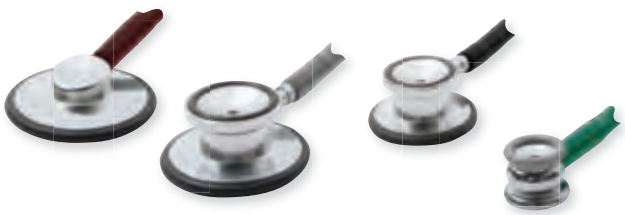
Ultra-light weight

Not made with natural rubber latex

Inspected and packaged in the U.S.A.

ADC manufactures more institutional scopes than any other firm anywhere. Our proprietary design features differentiate these value-priced instruments from others on the market. You'll find benefits like longer binaurals for a more comfortable fit or diaphragm and rim designs that improve acoustic performance by up to 50%.

- Lightweight comfort with sensitive acoustics
- Adult, Pediatric, and Infant sizes
- Diaphragm-only and diaphragm/bell combination chestpieces
- Variety of colors and packaging options for departmental coding and hospital use
- Display packaging for retail sales
- Disposable models that are MRI compatible
- Made without phthalates or natural rubber latex



660 Nurse Scope, 670 Adult Dual Head, 675 Pediatric Dual Head, and 676 Infant Dual Head

Proscope 662:
Bowles style with traditional raised stem design
(see page 77)

Individually boxed and institutional packaging options available

Proscopes™

Combining lightweight comfort with sensitive acoustics, ADC Proscopes™ are an ideal general-exam scope for the institutional setting.

The Proscope™ series features

- Choice of four models: diaphragm-only adult, combination diaphragm/bell adult, pediatric, and infant
- Proprietary diaphragm enhances acoustic response by up to 50% over competing designs
- Adjustable, lightweight extra-long aluminum binaurals with threaded PVC eartips
- Phthalate-free tubing in choice of 16 colors facilitates departmental coding
- Inspected and packaged in the USA
- One-year warranty

Teaching Stethoscopes

Teaching stethoscopes feature two headsets, allowing the student and the instructor to listen simultaneously. ADC offers options in both our premium Adscope® brand and our institutional Proscope™ series.

An essential training aid that allows teachers and students to listen to heart and lung sounds simultaneously.

Our Adscope 613 Teaching Scope is built with the same stainless-steel components used to make our legendary 603 instrument. Headsets are color coded: black for the teacher and royal blue for the student.

We offer two styles of teaching scopes in our Proscope brand, a diaphragm-only model and a combination diaphragm/bell model. Both offer two sets of binaurals.

Stethoscope Accessories

Keep your stethoscope secure and organized with accessories from ADC

The ADC line includes a selection of practical, well-designed accessories that can be used with most stethoscopes on the market today.

- The MEDIC instrument case holds a stethoscope or adult sphyg while securing an assortment of everyday tools.
- Wearable stethoscope holders come in two styles: our original Scope Hip Clip, made from lightweight plastic, and our newer Nylon Scope Holster with hook-and-loop adhesive and wraparound form. Both clip to your belt, uniform, or scrubs.
- Rounding out the line are two styles of plastic scope ID tags and a reusable tape holder.

MEDIC instrument cases in two sizes, Large and Small

In-house laser engraving is available with our scope ID tag. Whether you're looking to personalize a single instrument or adding department or corporate branding for an institutional purchase, our New York based production team is here to help. Call for more details.

Infrared Thermometers

ADC is one of the largest suppliers of thermometers to the professional medical channel. Our infrared thermometers use a lens system to focus infrared radiation onto a detector that converts the energy absorbed into an electrical signal. ADC offers five models of infrared thermometers, two tympanic and three non-contact.

All ADC infrared thermometers meet ASTM E1965-98 standards for accuracy.

All models feature:

- ✓ Infrared Technology
- ✓ F/C Switchable, LED Display
- ✓ Giftbox Packaging
- ✓ Batteries included
- ✓ 2-Year Warranty
- ✓ Audible Beep
- ✓ Auto Off

Adtemp™ 429 Non-Contact Thermometer

Easy-to-use infrared thermometer measures temperature instantly at the forehead! Convenient, non-contact measurement makes the Adtemp™ 429 the ideal instrument for use on all patients.

The Adtemp™ 429 infrared thermometer features

- One-second readings
- Large 6mm illuminated display
- °F/°C switchable display and switchable Human/Object modes
- Measuring range (Human)
  50.0°F - 122.0°F +/- .5°F (10°C - 50°C +/- .3°C)
- Measuring range (Object)
  32.0°F - 212.0°F +/- 1°F (0°C - 100°C +/- 1°C)
- 30-reading memory
- Audible beep when measurement complete (except Night mode)
- Night mode function mutes audibles for patient care
- Measures 5" (129.9 mm) long and weighs 3 oz (87g)
- Powered by two 1.55V AAA alkaline batteries (included)
- Optional wall cradle available

Adtemp™ Mini 432 Non-Contact Thermometer

The Adtemp™ Mini 432, is compact, lightweight, and incredibly portable. Clips to a retractable lanyard (included), making it the perfect instrument for patient rounds.

The Adtemp™ Mini 432 infrared thermometer features

- One-second readings
- Compact, lightweight size, measures 3.5" and 1.6 oz
- Color-coded LCD display with fever warning
- 9-reading memory
- °F/°C switchable display
- Rechargeable Li-ion battery, good for 1,000 measurements on a full charge, and 300,000 measurements over lifetime (micro USB cable included)
- Clips to wearable, retractable lanyard so it's always on hand
- Audible beep when measurement is complete

Adtemp™ 433 Non-Contact Thermometer

The Adtemp 433 features a trigger-style design and fast measurements. It's perfect for rapid screening in medical environments, offices, restaurants, and more.

The Adtemp™ 433 infrared thermometer features

- Accurate readings in less than two seconds
- Trigger-style design for rapid screenings at the forehead
- No skin contact required, minimizes the risk of cross contamination
- Color-coded LCD display with fever warning
- Dual mode, body and surface
- Audible beep when measurement is complete
- 50-reading memory
- °F/°C switchable display
- Uses 2 AAA batteries (included) with battery life of about 2,000 readings
- Measures 5.9'' x 1.7'' x 3.7'' (150 mm x 95 mm x 44 mm), weighs 4.6 oz. (130.5 g) with batteries
- Meets ASTM E1965-98 standards for accuracy
- 2-year warranty

Adtemp™ 424 Infrared Ear Thermometer

Easy-to-use tympanic thermometer measures core temperature instantly. Convenient, economical probe covers make it the ideal instrument for use on all types of patients.

The Adtemp™ 424 Thermometer features

- One-second measurement using scan/peak technology
- Large 6mm illuminated display
- Temperature range from 89.6°F - 108°F +/- .4°F (32°C - 42.2°C +/- .2°C)
- °F/°C switchable display
- Fever indicator at 99.5°F (37.5°C)
- Last-reading memory
- Audible beep when measurement is complete
- Auto off conserves battery life
- Compact design: 5½" (13.97cm) long, weighs 1.6oz (45.3g) including battery
- Powered by 3V (CR2032) battery (included)
- Includes 20 probe covers in convenient dispenser
- Desktop storage caddy

Digital Stick Thermometers

All Models Offer:
Dual Scale °F/°C
2-Year Warranty
Splash Resistance
Auto-Off
Last-Reading Memory
Batteries Included

ADC offers one of the largest selections of cost-effective digital stick thermometers to meet virtually any clinical setting. Our selection and unmatched quality control are why ADC's digital stick thermometer line is considered one of the best in the US.

- ✓ Eight distinct models
- ✓ Variety of packaging options and price points
- ✓ Measurement times from six to 60 seconds
- ✓ Flexible tip models for pediatric patient safety
- ✓ Specialty models for hypothermia or veterinary use
- ✓ All meet accuracy requirements for intermittent thermometers under ASTM E1112

Adtemp™ universal thermometer sheaths, compatible with all ADC digital stick thermometers and most competing brands, are available in a number of packaging options.

Adtemp™ 427 Temple Touch Thermometer

Provides an accurate six-second, non-invasive temperature reading at the temple making it ideal for pediatric patients. Cost-effective design makes it ideal for institutional use.

The Adtemp™ 427 Temple Touch features

- Non-invasive temple temperature measurement using patented conductive technology delivers clinically accurate readings in about six seconds
- Reduces the risk of cross contamination and avoids the need for costly probe covers
- Ideal for the hospital, clinic, or physician office
- Auto off function conserves battery life
- Audible tone when measurement is complete
- Last-reading memory
- Dual scale (°F/°C)
- Water resistant
- Large display
- Uses two AAA batteries (included)
  (Minimum 1000 full-duty cycles over 24-month period)
- Temperature range from 95°F to 107.6°F ± .2°F (35°C to 42°C ± .1°C)
- Compact design measures just 4.7" x 1.17" x 1"
  (12.0 cm x 3.0 cm x 2.4 cm)
- Weighs 1.3 oz (37g), including batteries

CATEGORY SPOTLIGHT

Diagnostics

ADC is one of a few firms to hold our own 510(k) and be classed as a manufacturer of EENT instruments

Our line of diagnostic EENT instruments totals nearly 900 model options, the largest selection by unique part number in the United States. We offer two brands: economical 2.5V portable Proscope™ models, and feature-rich 2.5V and 3.5V Diagnostix™ instruments in pocket, portable, desk, and wall systems.

Choose from our line of full-size 3.5V and 2.5V diagnostic instruments or compact pocket sets, depending on clinical needs or budget. We offer four different instrument heads, for virtually every type of physical exam:

- **Otoscopes for examination of the inner ear**
- **Ophthalmoscopes for examination of the eye**
- **Throat illuminators for examination of the mouth and throat**
- **Dermascopes for examination of the skin.**
- **Our 2.5V otoscope is available in a veterinary model, as well.**

PMV Otoscope

Purchase instruments individually or choose one of our popular combination sets, with hard and soft cases for storage.

All ADC otoscopes accommodate Welch Allyn® KleenSpec® disposable ear specula for the ultimate in convenience and affordability.

SOURCED GLOBALLY. INSPECTED, ASSEMBLED and PACKAGED LOCALLY

We contract with the world's leading manufacturers in Pakistan, Germany, and the U.S.A. to produce components to our exacting specifications. Then, using custom-built inspection equipment and factory-trained personnel, we perform rigorous testing in our New York headquarters before the instruments are assembled and packaged.

COMPREHENSIVE WARRANTIES

As with all ADC warranties, coverage for our Diagnostix and Proscope brand EENT instruments is among the industry's most comprehensive.

- **Proscope 2.5V Portable instruments are warranted for one year**
- **Diagnostix 2.5V Pocket instruments are warranted for two years**
- **Diagnostix 3.5V instrument heads, handles, and desk chargers are warranted for two years**
- **Diagnostix Adstation wall transformers and extension modules are warranted for five years**
- **Optical components are warranted for life**
- **Diagnostix AdLED lamps are warranted for life**

Special Medical Student Warranty: Diagnostix 3.5V Portable sets are covered through the second year of residency.

Learn more about power, lighting, and other features on pages 96-97

AMERICAN DIAGNOSTIC CORPORATION

Power Options for Any Clinical Need

Our 2.5V portable and pocket instruments are available with alkaline battery handles in pocket (AA) and portable (C) sizes.

Our 3.5V rechargeable battery handles (portable and desktop platforms) utilize Li-ion battery technology – the same found in smart phones, tablets, and electric cars. Combined with super-efficient LED lamps, our Li-ion battery provides up to 50 hours continuous operation between charges (compared to just two to three for NiMH or NiCad) and a whopping 1,200 charging cycles – 2.5X that of NiMh or NiCad. That means nearly four years of daily recharging, even longer if charged less often.

ADC's 3.5V Portable Diagnostix line has a new USB rechargeable handle option!
See page 101

ADC Adstations include a universal power supply with US plug. For international use, our Global Adapter Kit (item 5660TN-GAK) can be ordered separately. The kit includes three replacement plugs for the EU, UK, and Australia that connect to our universal power supply.

Diagnostic Adstation
See pages 109-112

Build Your Own

Our online Diagnostix Builder lets you create your perfect portable, desk, or wall configuration. Compare options and mix and match the features you're looking for.

www.adctoday.com/diagnostix/build

A Range of Illumination Options

Our **portable 2.5V instruments** are available with low-cost vacuum lamps.

Pocket instruments offer xenon illumination for a brighter, whiter light (3,200K), or AdLED lighting for true tissue color (4,200K).

Our **3.5V instruments** are available with either xenon lamps or our third generation LED technology — known as AdLED — for the ultimate in performance.

Comparing 3.5V Lighting Options

Xenon provides a bright white light (3,200K) with cooler operating temperatures.

AdLED provides near-perfect performance with a color temperature of 4,200K, 17,000 lux, 90+ color rendering index (CRI), and a life expectancy of 100,000 hours (compared with 20-30 hours for xenon). When combined with our Li-ion battery technology AdLED bulbs extend performance to levels never before achieved in an EENT instrument.

Diagnostix AdLED lights are warranted for life.

Adtronic™ Light Control

Our 2.5V portable instruments offer mechanical rheostatic light control. Our 3.5V instruments feature patented **Adtronic Electronic Rheostatic** light output control that provides infinite, continuously variable control. And because it's electronic, we built in an auto-off feature that engages after two minutes of inactivity to further conserve battery strength and lamp life.

Diagnostix 5110N:
Our compact, single-handle pocket set.
See page 106

Pocket Sets: Available in six colors!

ADC's Pocket Series Diagnostic Instruments include both an Otoscope and Ophthalmoscope. Choice of LED or xenon illumination and a compact size make these indispensable instruments for today's busy practitioner.

Instrument Heads

OTOSCOPES

Diagnostix™ 3.5V PMV (Panoramic Magnified View) Otoscope Head - Item 5422

- Twice the field of view and 66% greater magnification (11 mm field of view, 5X magnification) compared to standard otoscopes
- Significantly improved view of the auditory canal and tympanic membrane
- Fiber-optic light transmission for an unobstructed view
- Choose xenon or high-performance AdLED illumination
- Reflection-optimized, high-performance glass optics
- Adjustable focal depth
- Suitable for throat illumination and pneumatic otoscopy (insufflator sold separately)
- Compatible with Welch Allyn specula
- Anti-theft locking feature is standard
- Works with ADC's 5460, 5463, 5560, and 5660 handles (universal bayonet mount also compatible with other brands of 3.5V handles)
- Two-year warranty on instrument head
- Lifetime warranty on LED lamp
- Manufactured in Germany, inspected and packaged in the U.S.A.
- Specify "X" for xenon or "L" for LED when ordering

Diagnostix™ 3.5V Otoscope Instrument Head - Item 5420

- Fiberoptic light transmission for an unobstructed view
- Optical glass reduces reflection and provides 3x magnification
- Bidirectional swivel lens allows instrumentation
- Insufflator fitting for pneumatic otoscopy
- Compatible with Welch Allyn specula
- Instrument head uses universal bayonet mount for compatibility with other brands of 3.5V handles
- Anti-theft locking feature is standard
- Works with 5460, 5463, 5560, and 5660 handles
- Choose xenon or high-performance AdLED illumination
- Manufactured in Germany, inspected and packaged in the U.S.A.
- Two-year warranty on instrument
- Lifetime warranty on LED lamp
- Specify "X" for xenon or "L" for LED when ordering

Diagnostix™ 2.5V Pocket Otoscope Instrument Head - Item 5120N

- Choose AdLED or 2.5V xenon lamp for true tissue color
- Fiber optic light transmission for an unobstructed view
- Wide-angle swivel 2.5X viewing lens permits instrumentation
- Insufflator port for pneumatic otoscopy (fitting and insufflator sold separately)
- Works with 5160N handle
- Two-year warranty on instrument
- Manufactured in Pakistan, inspected and packaged in the U.S.A.
- Available in black, green (GR), royal blue (RB), purple (V), burgundy (BD), or gray (G)
- Specify "L" for LED when ordering

Proscope™ 2.5V Otoscope Instrument Head - Item 5220

- 2.5V vacuum lamp
- Direct illumination
- Bayonet locking mount
- Removable 3X magnifying lens
- Includes autoclavable, polypropylene ear specula in sizes 2.5mm, 3.5mm, and 4.5mm
- Welch Allyn disposable specula adapter included
- Works with 5211-5 battery handle
- One-year warranty on instrument
- Manufactured in Pakistan, inspected and packaged in the U.S.A.

OPHTHALMOSCOPES

Diagnostix™ Coax and Coax Plus 3.5V Ophthalmoscope Instrument Heads

- High-performance aspherical condenser lens reduces corneal reflection
- Ergonomic design and integral thumb rest improves stability and allows one-finger control of all functions
- Dust-proof housing and soft synthetic rubber brow rest for use with eyeglasses
- Magnified/illuminated aperture viewing window
- Works with ADC's 5460, 5463, 5560, and 5660 handles; universal bayonet mount also compatible with other brands of 3.5V handles
- Anti-theft locking feature is standard
- Choose xenon or high-performance AdLED
- Two-year warranty on instrument
- Lifetime warranty on LED lamp
- Specify "X" for xenon or "L" for LED when ordering

Coax Ophthalmoscope (Item 5440) also includes:

- Twenty-nine viewing lenses from -35 to +40 Plus: 1-10, 12, 15, 20, 40; Minus:1-10, 15, 20, 25, 30, 35
- Twenty-four aperture/filter combinations for improved versatility

Coax Plus Ophthalmoscope (Item 5442) also includes:

- Eighty-nine viewing lenses Plus: single step from 1-45; Minus: single step from 1-44
- Secondary focusing wheel with zero retention for quick correction of ametropias, provides virtually unlimited fine focus or fast focus in lieu of the 89 viewing lenses
- Twenty-eight aperture/filter combinations for improved versatility

5440

5442

Diagnostix™ 2.5V Pocket Ophthalmoscope Instrument Head - Item 5140N

- Choose AdLED or 2.5V xenon lamp for true tissue color
- Five aperture selections: small spot, large spot, semicircle, fixed, and red-free filter
- Nineteen viewing lenses from -20 to +20 diopters for better resolution
- Illuminated magnified lens dial
- Soft synthetic rubber brow rest is helpful when using with eyeglasses
- Meets or exceeds ISO 10942, ISO 15004-1, and ISO 15004-2
- Works with 5160N handle
- Two-year warranty on instrument
- Manufactured in Pakistan, inspected and packaged in the U.S.A.
- Available in black, green (GR), royal blue (RB), purple (V), burgundy (BD), or gray (G)
- Specify "L" for LED when ordering

Proscope™ 2.5V Ophthalmoscope Instrument Head - Item 5240

- 2.5V vacuum lamp
- 24 corrective lenses from –25 to +40 diopters
- Medium spot aperture
- Bayonet locking mount
- Works with 5211-5 handle
- One-year warranty
- Manufactured in Pakistan, inspected and packaged in the U.S.A.

THROAT ILLUMINATORS

Diagnostix™ 3.5V Throat Illuminator Instrument Head - Item 5426

- PMMA light transmission
- Tongue blade holder facilitates examination of the mouth and throat
- Manufactured in Germany, inspected and packaged in the U.S.A.
- Eject button discards used tongue blade
- Works with 5460, 5560, and 5660 handles
- Two-year warranty on instrument
- Lifetime warranty on LED lamp

Specify "X" for xenon or "L" for LED when ordering

DERMASCOPES

Diagnostix™ 3.5V Dermascope Instrument Head - Item 5450

- Direct Illumination
- Optical grade 10X focusable magnifying lens
- Large knurled focusing ring
- Removable contact plate with mm scale
- Soft synthetic rubber eyepiece is helpful when using with eyeglasses
- Anti-theft locking feature is standard
- LED illumination only
- Two-year warranty on instrument
- Lifetime warranty on LED lamp

Proscope™ 2.5V Dermascope Instrument Head - Item 5312-3

- Bright 2.5V halogen illumination ensures true tissue color for accurate identification
- 10X optic system
- Removable contact plate is autoclavable
- Large knurled focusing ring
- Reticle contact plate etched onto the lens in millimeters permits easy measurement of suspicious lesions
- Bayonet locking mount
- Soft synthetic rubber eyepiece is helpful when using with eyeglasses
- Works with 5260 handle
- One-year warranty on instrument
- Manufactured in Pakistan, inspected and packaged in the U.S.A.

Power Supply

Global Adapter Kit

Diagnostix™ 3.5V Global Adapter Kit

Our Global Adapter Kit is a set of three AC plugs that can convert our Diagnostix 3.5V universal power supply for use outside the U.S.

- Includes three replacement plugs for the EU, UK, and Australia (Power cord not included.)
- Plugs quickly connect to the universal power supply that ships with Diagnostix Adstation wall transformers and extension modules, as well as the Diagnostix desk set charging station
- Two-year warranty

Desk Recharger

Ordering Information

Item	Description
5500	3.5V Diagnostix™ Desk Recharger
5660TN-GAK	Global Adapter Kit, EU, UK, AU

Diagnostix™ 3.5V Desk Recharger

- Compact and portable desk charging station for two Diagnostix™ rechargeable 5560 handles
- Includes reducing sleeve for use with smaller AA sized handles
- Colored LED power indicator displays charging state
- Storage compartment accommodates a small selection of specula or spare lamps
- Includes wall-mount bracket for permanently mounting to wall or cabinet
- Includes universal power supply with U.S. plug; for international use, our Global Adapter Kit (5660TN-GAK) can be ordered separately

Diagnostix™ 2.5V Pocket Battery Handle

- AA 2.5V battery handle
- On/Off power switch integrated into pocket clip
- Metal-lined thermoplastic barrel
- Two-year warranty
- Manufactured in Pakistan, inspected and packaged in the USA
- Works with 5120N and 5140N instrument heads
- Available in black, green (GR), royal blue (RB), purple (V), burgundy (BD), or gray (G)

Ordering Information

Item	Description
5160N*	Diagnostix™ 2.5V Pocket Battery Handle

* Specify "BD" for Burgundy, "G" for Gray, "GR" for Green, "RB" for Royal Blue, or "V" for Purple when ordering. (Black is standard.)

Proscope™ 2.5V Portable Handles

- C-cell 2.5V power supply
- Rheostatic illumination control
- Knurled brass handle for positive grip
- Bayonet locking mount
- One-year warranty
- Manufactured in Pakistan, inspected and packaged in the USA
- 5211-5 works with 5220, 5240, and 5215-TH instrument heads
- 5260 works with 5312-3 instrument head

Diagnostix 3.5V Adstation

ADC's Diagnostix 3.5V Adstation offers a complete diagnostic solution, putting a full assortment of core tools within easy reach. With our modular system, you can start with a single EENT tool, then add up to three additional instruments plus blood pressure and thermometry.

Instrumentation:

- **Coax or Coax Plus Ophthalmoscope**
- **Standard or PMV Otoscope**
- **Throat Illuminator and Dermascope also available**

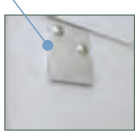
Blood Pressure:

- **Clock Aneroid Sphygmomanometer**
- **ADView 2 Modular Diagnostic Station**
- **e-sphyg 3 Digital Blood Pressure Monitor**

See pages 104 and 105 for our most popular configurations. Or visit our online Diagnostix Builder tool to mix and match the features you're looking for.

adctoday.com/
diagnostix/build

Completely Modular
Start with a single-instrument wall transformer and expand with up to three more connected extension modules



French cleat mounting

New, Simplified Wallboard!
We've updated our Adstation wallboard to a universal one-size design. Made of a compressed particle board, the new system uses a French cleat mount that's fully compatible with competitive designs, allowing for a quick installation on existing hardware. New installations ship with all assembly hardware and an easy-to-use template to simplify mounting.

Laryngoscopes

Every Satin reusable laryngoscope is inspected and packaged in the U.S.A. and includes a one-year warranty.

Our Satin™ brand of reusable laryngoscopes are available in a range of blade and illumination styles.

Blades are available in three popular styles: Macintosh, Miller or Wisconsin, in sizes 00 to 4. All blades offer stainless-steel construction with a satin finish for unsurpassed performance and durability.

Lightweight handles are available in three sizes: Medium, Small, and Stubby. Macintosh and Miller profiles can be paired with standard handles or fiber-optic handles, which feature a removable light pipe for simplified disinfection and longer life.

Every Satin reusable laryngoscope is inspected and packaged in the U.S.A. and includes a one-year warranty.

ADC laryngoscope components are compatible with all major brands of laryngoscopes conforming to ISO 7376.

See page 116 for a detailed feature chart.

Order individually or in complete sets featuring a full selection of blades and handles in a fitted case (see page 117).

Fiber-optic handles are color coded green to signify the use of fiberoptic blades

Satin handles designed with a knurled finish for a positive grip.

Available in three sizes: Medium, Small, and Stubby

AMERICAN DIAGNOSTIC CORPORATION

CPR and Airways

- **Functional, easy-to-use tools for resuscitation**
- **Multiple packaging options for teaching or first-aid applications**
- **Solutions for pocket, purse, glove box, or trauma kits**

ADC's line of CPR products and resuscitation aids combine a tradition of innovation with a commitment to value. Products include:

Disposable Oral Airways for enhanced access to the respiratory tract. Our Berman style kit includes six sizes and two packaging options, polybag or translucent boxed case. Our Guedel style kit includes eight sizes in a translucent boxed case. Page 119.

Adsafe™ Face Shields and Valve Masks for safe and effective resuscitation. Face Shields help eliminate hesitation when performing CPR and can be purchased in sets of individual foil packs or packaged in convenient pocket keychains. The Adsafe CPR Pocket Resuscitator is a portable tool that's equipped with a high-efficiency one-way valve. Pages 119-120.

ADC enjoys a reputation for building premium medical equipment that's equal parts durable and economical – one of the many reasons we're a favorite in the world of emergency medicine. Learn more at:

AMERICAN DIAGNOSTIC CORPORATION

Adsafe™ CPR Pocket Resuscitator

The Adsafe™ CPR Pocket Resuscitator combines functionality with portability. Equipped with a filter-protected, replaceable one-way valve, it folds flat into a compact, splash-resistant clamshell storage case that measures just 5" x 4⅓" x 1½". Quick accessibility, dual invertible use, and standardized connection make this resuscitator an essential addition to your CPR equipment needs.

The Adsafe™ CPR Pocket Resuscitator features

- High-efficiency and low-resistance one-way valve minimizes the possibility of cross-contamination
- 15mm O.D. connector can be attached to any standard ventilation and oxygen equipment
- For use on adults, and can be inverted for infants/children
- Ergonomically shaped mask with soft-air cushion for leak-free performance, easy grasp, and patient comfort
- Disposable valve to avoid cross-contamination
- Elastic green strap to keep mask in place on patient
- Operating instructions, disposable gloves, and alcohol wipe included
- Pocket storage case

Neuro Instruments

One-Year warranty

Inspected in the U.S.A.

ADC neurological instruments include the essentials professionals need to assess the peripheral and central nervous systems. Our line features six reflex instruments and six tuning forks.

Reflex instruments offer ergonomic designs constructed with high-quality materials like stainless steel, chrome, and non-latex, non-phthalate rubber.

Our selection includes:

- **Taylor Hammer**
- **Buck Hammer**
- **Babinski Hammer**
- **Queen Square Hammer**
- **Tromner Hammer**
- **Wartenberg Pinwheel**

Our tuning forks are machined from high-grade aluminum alloy and offer accurate frequency response in the most popular frequencies, from 128 to 4096 Hz.

Our Neurological Hammer Set includes five instruments in a deluxe fitted box. Makes a great gift item!
See page 131.

Features of an Authentic ADC Tuning Fork

ADC tuning forks are machined in the USA from non-magnetic, corrosion-resistant aluminum alloy in 3/8" x 1" solid bar stock. Finished instruments do not bend, break, or deteriorate under normal use. The overall finish is a smooth satin aluminum.

ADC tuning forks are medical grade and accurate to .5% of their rated frequency response. Weights, which can be found on 128 Hz and 256 Hz instruments, are equally sized on each fork and are mounted securely about a quarter of an inch below the fork tips. The bottom of the fork handle is slightly beveled, with a small indent at the center.

ADC tuning forks are marked on both sides of the instrument. One side is stamped with the instrument frequency and the other is stamped ADC.

AMERICAN DIAGNOSTIC CORPORATION

Tuning Forks

Aluminum alloy tuning forks designed and manufactured to meet the demanding needs of the medical profession.

The ADC Tuning Forks features

- Non-magnetic, corrosion resistant aluminum alloy construction
- Weighs 1/3 of comparable steel tuning forks
- Produced from 3/8" x 1" bar stock for superior performance and consistent frequency accuracy
- Extra-long 2" handle of turned smooth aluminum to facilitate bone conduction tests
- Available in six frequency ranges (cycles per second, or cps)

Diagnostic Penlights

Most models are available in a variety of colors and packaging options.

ADC Adlite™ and Metalite™ diagnostic penlights include reusable and disposable options at a full range of price points.

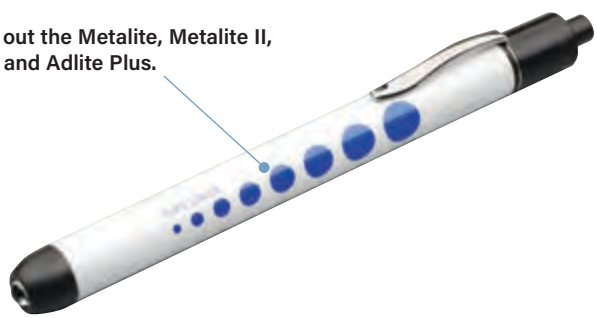
The **Adlite Pro** is our top-of-the line, super-premium reusable model. It's CNC machined from brass and features LED technology that's warranted for life. An innovative positive-feel power switch won't accidentally light when in your pocket.

Other reusable models include the **Metalite and Metalite II**, durable styles designed with aluminum housings, and the **Adlite II**, made with a plastic housing for lightweight comfort. All are incredibly economical solutions.

We also offer two disposable models, the **Adlite and Adlite Plus**. Featuring a sealed concentric beam, they provide a cost-effective solution to examining pupillary reflex.

Looking for a penlight with a pupil gauge?

Check out the Metalite, Metalite II, Adlite, and Adlite Plus.



AMERICAN DIAGNOSTIC CORPORATION

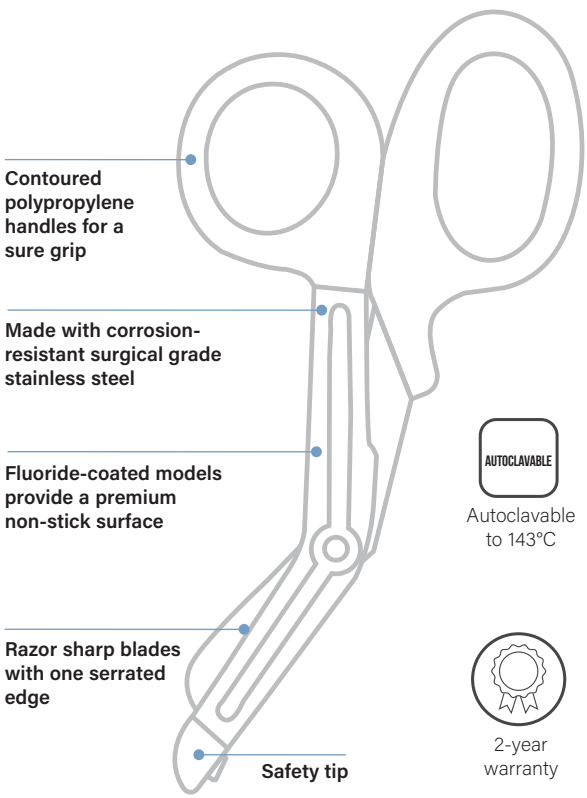
Instruments

Precision crafted from the best materials in the world and backed by the industry's most comprehensive warranties

ADC's surgical instruments and accessories are designed and manufactured to our exacting specifications to withstand the rigors of daily use. Our line has been carefully curated to include a wide selection of the most popular tools, covering a variety of practical applications. From scissors and hemostats crafted from surgical stainless steel to our Medicut® brand nursing and EMS shears, we have the products professionals need to get the job done.

- **Bandage and operating scissors and multiple styles and sizes of forceps**
- **Emergency tools like our Puma folding pocket knife and finger ring cutter**
- **Specialty and general-use measurement tools**



MEDICUT®

ADC's Medicut shears, along with our smaller-scale MiniMedicut styles, are the best-selling brand of medical grade utility shears in the world.

AMERICAN DIAGNOSTIC CORPORATION

Medicut® Shears

Available in two sizes, ADC's Medicut® shears are the world's best selling brand of medical grade utility shears.

Medicut Shears feature

- Razor sharp, super-hardened surgical stainless-steel blades with one serrated edge to cut through the toughest materials
- Blades tempered to a Rockwell hardness of C56 for unsurpassed durability
- Fluoride-coated models provide a premium non-stick surface ideal for cutting through sticky materials like tape and bandages.
- Contoured polypropylene handles with large ring provide maximum control and comfort
- Extra-large rivet with a rated strength of 88kg assures rugged durability
- Autoclaved at 143ºC (290ºF)
- Available in traditional 7¼", or smaller 5½" length
- Inspected in the USA
- Two-year quality performance guarantee

Medicut Shears also include

- Traditional 7¼" length for maximum leverage and strength
- Stainless-steel safety bandage tip

MiniMedicut Shears also include

- Smaller 5" length is ideal for cutting bandages, tape, and clothing
- Polypropylene safety bandage tip color coordinated to the handle

Our Promise to You

Because of our commitment to provide the very highest quality products and service, ADC has worked successfully towards certification to the ISO 13485:2016 quality management system standard under the Medical Device Single Audit Program or MDSAP.

The ISO 13485:2016 standard is specifically designed to be applicable to medical device manufacturers, and includes requirements for quality, management responsibility, and commitment to continually improving our products and services. The MDSAP program is a global system, involving regulations from multiple countries rolled into a single audit to ensure that ADC's systems meet the requirements of key global markets. The designation was earned from UL LLC, a leading international standards, testing, registration, and certification organization.

Why Be ISO Certified?

While no organization must be ISO 13485:2016 certified, it has become a standard for conducting business in the international arena. In fact, ISO 13485:2016 is the primary quality system standard accepted internationally for medical device manufacturers. ADC's certification, which was earned after a thorough, independent audit of our quality management system, facilitates our company's CE marking of products for sale in Europe. It is also recognized by Canadian, Australian, Japanese, and US regulatory authorities as showing compliance with regulations in each of these countries.

A quality management system under ISO 13485:2016 also ensures that our products and services are monitored for safety, effectiveness, and for opportunities for improvement. To keep this certification, a company must maintain this commitment and incorporate a process of continual improvement and satisfaction into all aspects of our business activities.

Everyone at ADC is part of the ISO experience; it's a company-wide philosophy of business practices that puts the needs of our customers at the center of all that we do. ISO certification isn't one time, it's a continuous quality-improvement process.

And that's our promise to you.
