

**Skin has many
stories to tell.
You just need to be
able to read them.**

HEINE dermatoscopes

Overview

It goes without saying that all of our dermatoscopes are premium products. But, still, they differ in one or two details. Read on for a summary of what these different details are and all their benefits:

	DELTA 30 PRO	DELTA 30	DELTAone	iC1	DELTA 20T	mini 3000
Polarisation	polarised + non-polarised (switchable)					non-polarised (immersion)
Illumination	LED ^{HQ} with colorSHIFT	LED ^{HQ}				XHL or LED ^{HQ}
Free field of view – diameter in contact mode	30mm	30mm	21mm	digital	20mm	14mm
Magnification	10x	10x	10x	up to 40x digital	10x	10x
Handle options power sources	USB cable, table charger		USB cable		battery handle, USB rechargeable handle, rechargeable handle with table charger, EN 200 EN 200-1	battery handle, rechargeable handle with table charger
Contact plate	contact plate with scale				contact plate with scale, contact plate without scale	
Small contact plate*	optional			–	optional	
HEINE distance working ring	optional		–			
Digital documentation	with adaptor and app			with iPhone iPod touch** and app	with optional SLR photo adaptor	–
Catalogue page	96	98	99	100	101	102

* for difficult-to-access pigmented lesions

**The Apple iPhone or iPod touch is not included in the scope of delivery. Apple, the Apple logo, iPhone and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc.

Invented to discover.

The new DELTA 30 PRO dermatoscope.

Since the LED^{HQ} elements have been repositioned in our new high-end dermatoscope, the light reaches deeper layers of the skin. This gives an extremely vivid, spatial impression of lesions – similar to a 3D image. So even the details of the details stand out.

The HEINE colorSHIFT function is a genuine world first. It allows you to easily adjust the colour temperature to suit your own viewing habits. Go from warm white to bluish white in 4 stages.

Regardless of whether you prefer working close-up or further away, the image is always sharp and crystal clear.

NEW | **HEINE DELTA® 30 PRO dermatoscope**
High-end dermatoscope with our best imaging

Since the LED^{HQ} elements have been repositioned, the light reaches deeper layers of the skin too. This gives an extremely vivid, spatial impression of lesions – similar to a 3D image. The HEINE colorSHIFT function is a genuine world first. It allows you to easily adjust the colour temperature to suit your own viewing habits.

HEINE diSTANCE working ring: The stable working ring enables the user to examine and manage a lesion under magnification by maintaining a constant distance between the skin and the dermatoscope without contact. (optional)

EXTREMELY VIVID, SPATIAL IMPRESSION OF LESIONS

- ▶ Very good assessment of lesions' spatial structure possible due to deeper light penetration thanks to angled and directional LED^{HQ} arrangement
- ▶ Easier to distinguish between dark and white structures and patterns during polarisation
- ▶ Switch between polarised and non-polarised light at the touch of a button = toggle function
- ▶ Crystal-clear image, no matter whether you prefer to work close-up or further away
- ▶ Large field of view with 'real' 30 mm Ø due to 32 mm lens

CHOOSE THE LIGHT COLOUR TO SUIT YOUR OWN PREFERENCES WITH HEINE colorSHIFT

- ▶ 4 colour temperature stages from warm white to bluish white
- ▶ Adjustable to suit your own habits and preferences or the challenges posed by the lesion to be examined

STURDY AND DURABLE

- ▶ Particularly resistant to disinfectants due to new plastics
- ▶ Improved battery life

INTUITIVE AND ERGONOMIC

- ▶ Ergonomic handling due to angled product design
 - ▶ Scale on eyepiece shows the focus setting – for easy preselection of certain settings for specific users and/or for use with a camera or smartphone
 - ▶ Easy charging due to USB-C
 - ▶ Rechargeable battery with Li-ion technology
 - ▶ Fast change from contact to non-contact examination
 - ▶ Custom light intensity: 3 degrees of luminous intensity
 - ▶ 10x magnification
 - ▶ No cross-contamination: autoclavable contact plate with scale
 - ▶ Small contact plate for hard-to-reach lesions
- ▶ **Digital documentation:** Image and data management convenient and intuitive. More information can be found on our website: www.heine.com/en/digital

HEINE DELTA® 30 dermatoscope

Reliable diagnostics

Digital documentation
by HEINE

Not only would the HEINE DELTA 30 win any beauty pageant, but stands out due to its very good imaging. Combined with a field of view measuring a veritable 30 millimetres and unprecedented colour rendering, in LED^{HQ} of course. Polarisation provides glare-free and non-reflective working conditions. Above all else, it is comfortable to operate with its angled, ergonomic design and intuitive control.

HEINE diSTANCE working ring: The stable working ring enables the user to examine and manage a lesion under magnification by maintaining a constant distance between the skin and the dermatoscope without contact. (optional)

- ▶ **Large true field of view of 30mm** (lens 32mm)
- ▶ **Crystal-clear image** with the achromatic HEINE optical system
- ▶ **Fast change from contact- to non-contact examination**
- ▶ **Ergonomic handling** thanks to the angled product design
- ▶ **Operate with just one hand:** individual focusing dioptre compensation approximately -4 to +4 dpt.
- ▶ **Excellent colour rendering** due to LED^{HQ}
- ▶ **Digital documentation:** Image and data management convenient and intuitive. More information on our website: www.heine.com/en/digital
- ▶ **Glare-free and non-reflective working conditions** thanks to polarisation
- ▶ **Custom light intensity:** 3 degrees of luminous intensity
- ▶ **10x magnification**
- ▶ **Switch between polarised and non-polarised light at the touch of a button** = toggle function. For more information, please visit heine.com/en/Toggle
- ▶ **No cross-contamination:** autoclavable contact plate with scale
- ▶ **Maintenance-free** due to our dustproof design
- ▶ **Rechargeable battery with Li-ion technology:** no memory effect; you can safely recharge the battery regardless of its charge state

HEINE DELTAone dermatoscope

Uniting diagnostic precision and mobility

Digital documentation
by HEINE

Small on the outside, big on the inside. This mobile marvel is taking medical professionals by storm. The crystal-clear image was accomplished using the achromatic HEINE optical system. What's more, it produces extraordinary colour rendering, due to the quality of our LED^{HQ}. Examinations are now particularly comfortable due to the polarisation allowing doctors to work glare-free and without disrupting reflections. These three features – clarity, LED^{HQ} and non-reflective working – plus the small dimensions, naturally, are what turn the DELTAone into a vital working tool wherever you go.

- ▶ **Fits into any pocket**
- ▶ **Crystal-clear image** with the achromatic HEINE optical system
- ▶ **Fast change from contact to non-contact examination**
- ▶ **Excellent colour rendering** due to LED^{HQ}
- ▶ **Glare-free and non-reflective working conditions** thanks to polarisation
- ▶ **Operate with just one hand:** individual focusing dioptre compensation approximately -4 to +4 dpt.
- ▶ **Digital documentation:** Image and data management convenient and intuitive
More information on our website: www.heine.com/en/digital
- ▶ **Field of view of real 21 mm** (lens 22 mm)
- ▶ **Custom light intensity:** 3 degrees of luminous intensity
- ▶ **10x magnification**
- ▶ **Switch between polarised and non-polarised light at the touch of a button** = toggle function. For more information, please visit heine.com/en/Toggle
- ▶ **No cross-contamination:** autoclavable contact plate with scale
- ▶ **Maintenance-free** due to our dustproof design
- ▶ **Rechargeable battery with Li-ion technology:** no memory effect; you can safely recharge the battery regardless of its charge state

HEINE iC1 dermatoscope

The digital dermatoscope

Digital documentation
by HEINE

- ▶ **Sharp, sharper, sharpest.** The HEINE iC1 is a device designed for capturing clinical and dermatoscopic images for documenting and supporting differential diagnosis of melanomas and other skin lesions. Developed in our unrivalled HEINE quality, the iC1 delivers sharp, shadow-free images.
Thanks, to both our precise, aspherical optical system and, the 12-megapixel image quality when using an iPhone® 6s or later model
- ▶ **Digital documentation:** Image and data management convenient and intuitive. More information on our website: www.heine.com/en/digital
- ▶ **Big, bigger, biggest.** The high-quality aspherical optical system with up to 40x true magnification offers everything you need in a practice
- ▶ **There's LED. And there's LED^{HQ}.** HEINE has set a new standard which maintains that only the best is good enough, from the selection of materials to processing, from light intensity and thermal management to a colour rendering index as high as possible. **That's what we call LED in HEINE Quality – or LED^{HQ}**
- ▶ **At the press of a button – the toggle function.** With two switching buttons, the option to switch back and forth between polarisation and immersion images is always within easy reach, regardless of the working position.
For more information, please visit heine.com/en/Toggle
- ▶ **Many see a smartphone. We see an exceptional camera and first-class display.** We've opted for the iPhone® for reasons of quality, user orientation and costs. From our perspective it offers the best camera, a display with the highest resolution and the most progressive touchscreen technology

HEINE DELTA® 20T dermatoscope

The classic

- ▶ **Crystal clear, high-resolution images** thanks to the high-quality achromatic optical system. The focusing system delivers 10 to 16x magnification for a detailed view of even the smallest structures
- ▶ **Toggle function for switching between polarised and non-polarised illumination mode.** With the press of a button. No exchange of contact plates necessary. The additional diagnostic function allows detection of “blink signs” when viewing crystalline structures and milia. For more information, please visit heine.com/en/Toggle
- ▶ **Glare-free and reflection-free view thanks to polarisation, even without immersion fluid.** For fast and flexible work
- ▶ **With just one hand:** individual focusing, range of correction approximately -6 to +6 dpt.
- ▶ **There's LED. And there's LED^{HQ}.** HEINE has set a new standard which maintains that only the best is good enough, from the selection of materials to processing, from light intensity and thermal management to a colour rendering index as high as possible. **That's what we call LED in HEINE Quality – or LED^{HQ}**
- ▶ **The DELTA 20T is also capable of digital documentation:** using the HEINE digital camera lens system, the dermatoscope can be connected to the SLR cameras of major brands without any issues. Specially developed photo adaptor lenses combine the camera and DELTA 20T to create an unbeatable pair

HEINE mini 3000® dermatoscope

Compact pocket dermatoscope with XHL or LED^{HQ} illumination

Modern pocket dermatoscope with concentrated, bright light for uniform illumination with exact colour rendering. Unique, compact design with high quality optics. 10x magnification with focusing optics, metal instrument head. Can be used with the mini 3000 handle system. Handle available in black and blue, instrument head only available in black|silver.

FEATURES FOR BOTH INSTRUMENTS (XHL AND LED):

- ▶ **Modern pocket dermatoscope with handy dimensions:** small on the outside, but big on the inside
- ▶ **10x magnification**
- ▶ **Focus setting for compensation of ametropia: ± 4 dpt.**
- ▶ **Instrument head made of metal**
- ▶ **20,000 ON|OFF switch cycles guaranteed**
- ▶ **Distortion-free image** with high resolution edge to edge thanks to high-quality, colour-neutral achromatic optical system
- ▶ **Special small contact plate** for the examination of difficult-to-access pigmented lesions, for instance between the fingers or toes

SPECIAL FEATURES OF THE LED INSTRUMENTS:

- ▶ **There's LED. And there's LED^{HQ}.** HEINE has set a new standard which maintains that only the best is good enough, from the selection of materials to processing, from light intensity and thermal management to a colour rendering index as high as possible. **That's what we call LED in HEINE Quality – or LED^{HQ}**
- ▶ **Twice as bright** as a conventional XHL (xenon halogen) dermatoscope
- ▶ **Maintenance-free LED^{HQ} illumination** – no longer a need to replace the light source
- ▶ **Exclusive battery performance indicator:** When the instrument is switched on, the maximum light intensity is shown, then the light intensity is regulated down to the level that corresponds to the current charge status of the battery so you know when your batteries need changing
- ▶ **Fade-out feature: brightness reduces slowly even with low residual capacity,** for even more efficient use of dry or rechargeable batteries
