

STRATAFIX™ Knotless Tissue Control Device Product & Procedure Compendium

The most versatile portfolio to meet your wound closure needs

Specialties include:

- Orthopaedic
- Plastics
- Gynecology
- General and Colorectal
- Bariatrics
- Urology

For optimal surgical results, successful wound closure is essential

Wound-closure products should:

- Securely approximate the wound
- Distribute tension appropriately
- Address risk factors for surgical-site infection
- Provide optimal cosmetic results

Specific needs must be addressed in each tissue type:

	Tissue Type	Specific Needs
	Skin	Adjunctive cosmesis benefits/infection protection
	Fascia	Strength (rupture reduction), avoid dehiscence, and infection protection
	Muscle	Strong, secure closure with low incidence of wound disruption and incisional issues
	Organ	Tissue health and precision

To help achieve their goals for various surgical specialties, surgeons can turn to the STRATAFIX™ Knotless Tissue Control Device portfolio from Ethicon

STRATAFIX™ Knotless Tissue Control Devices

An unmatched portfolio to meet your wound-closure needs

More Security*

- Provides greater strength and security of interrupted closure, without knots¹⁻¹¹
- In preclinical studies, cutting the STRATAFIX™ Symmetric Device or the STRATAFIX™ Spiral Device in a bidirectional design did not result in tissue separation^{3,5,6,8}
- Superior tissue holding strength compared to looped PDS® Plus Antibacterial (polydioxanone) Suture continuous technique, Coated VICRYL® (polyglactin 910) Suture interrupted technique, and V-loc™ 180 Absorbable Wound Closure Device¹

More Consistency*

- Enables surgeons to easily manage tension and control approximation with each pass^{7,8,10}

More Efficiency^{7-14*}

- No knots
- No need for an assistant to follow the suture line (no need to hold the tension after each bite)
- Potentially less time under anesthesia^{12,13}

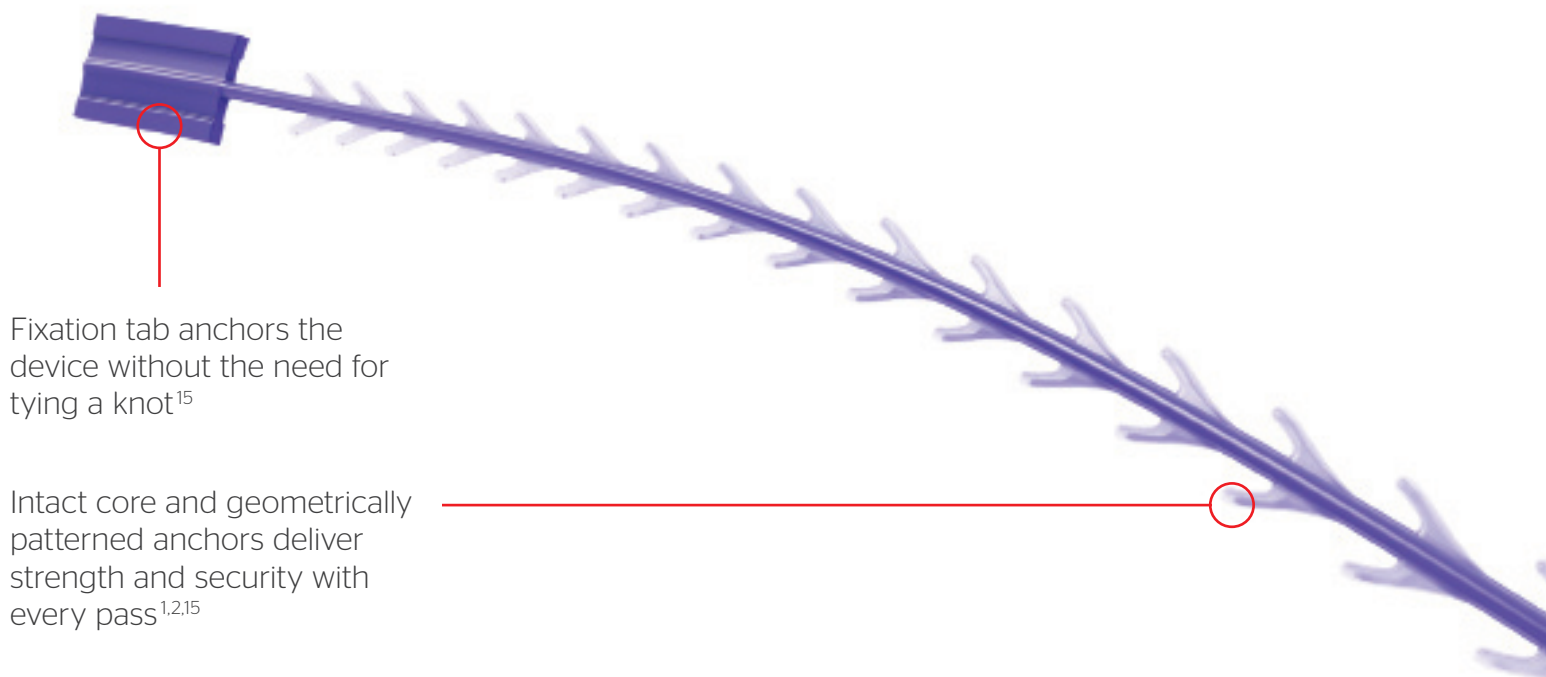

*Than traditional sutures

Stratafix™

STRATAFIX™ Symmetric PDS™ Plus Knotless Tissue Control Device

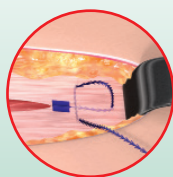

The only knotless tissue device that provides strong, secure closure appropriate for high-tension areas such as fascia^{1-5,15}

Symmetric

Pressed **symmetrical anchors** maintain the core of the device¹⁵

Superior tissue holding strength compared to looped PDS® Plus Antibacterial (polydioxanone) Suture continuous technique, Coated VICRYL® (polyglactin 910) Suture interrupted technique, and V-loc™ 180 Absorbable Wound Closure Device¹

* STRATAFIX Symmetric PDS Plus Device offers **Plus Antibacterial Technology** to address risk factors associated with surgical site infection (SSI)¹⁵

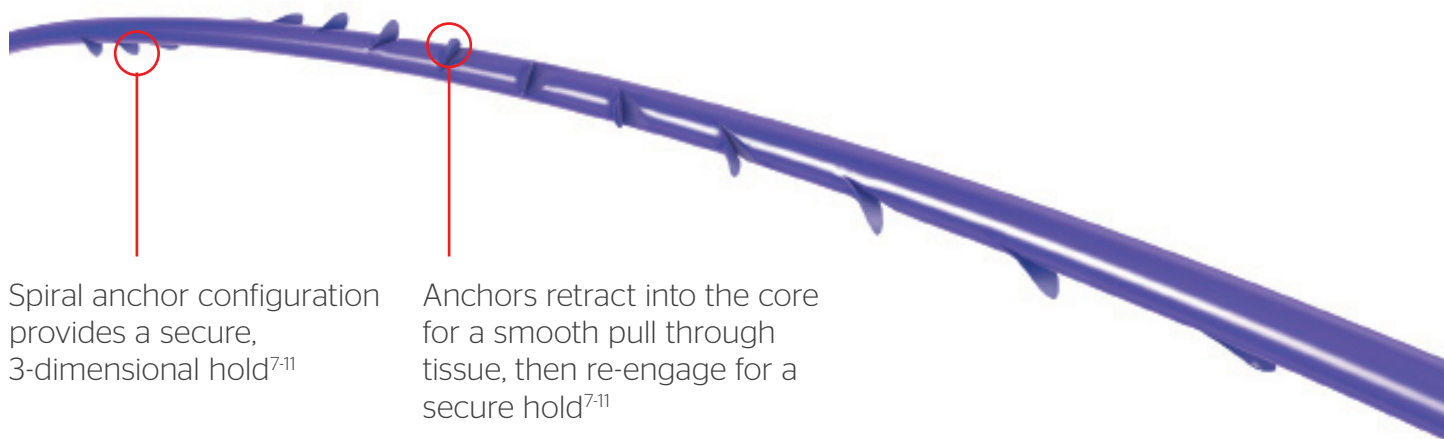

ETHICON
