

STRATAFIX™ Knotless Tissue Control Device

EMEA Portfolio Product Catalogue 2017

A versatile portfolio to meet your wound closure needs

CE mark pending. For internal use only!
Not for distribution to customers.

STRATAFIX™ Knotless Tissue Control Devices

A versatile portfolio to meet your wound closure needs

Multiple anchor designs and patterns provide more versatility and a unique combination of benefits¹

STRATAFIX™ Symmetric PDS™ Plus Knotless Tissue Control Device

The **only** knotless tissue device that provides strong, secure closure appropriate for high-tension areas such as **fascia**^{1,*}

Symmetric

Superior tissue holding strength compared to PDS™ Plus Antibacterial (polydioxanone) loop continuous technique, VICRYL™ interrupted technique, and V-LOC™ 180^{1,11}

^{**} STRATAFIX™ Symmetric PDS™ Plus Device offers **Plus antibacterial technology** to address known risk factors associated with SSI¹

STRATAFIX™ Spiral Knotless Tissue Control Device

A broad range of **bidirectional** and **unidirectional** devices, offers the **smooth glide** of a traditional suture^{1,3-9}

Spiral

Anchors formed within the core of the device in a **spiral** pattern¹⁰

Bidirectional design allows for management of tension from the middle

^{**} Unidirectional design, **with Plus antibacterial technology**, has adjustable loop on end¹

* Refers to STRATAFIX™ Symmetric PDS™ Plus Knotless Tissue Control Device Only.

^{**}The petri dish image is for illustrative purposes only, zone of inhibition testing results can vary.

In a pre-clinical study, STRATAFIX™ Symmetric PDS™ Plus Knotless Tissue Control Device provided greater wound holding strength than traditional running sutures of the same size and polymer, while eliminating knot-related complications.^{1,11}

- **Only Ethicon** offers tissue control devices, with Plus antibacterial technology, that provide appropriate strength for closing high-tension areas, such as **fascia**^{1, *}
- **Superior tissue holding strength** compared to interrupted technique with Coated VICRYL™ (polyglactin 910) Suture, continuous technique with PDS™ II (polydioxanone) Suture, and V-Loc™ 180 Wound Closure Device.^{1,11}
- **Plus Antibacterial technology** designed to address a known risk factor for SSIs¹

* Refers to STRATAFIX™ Symmetric PDS™ Plus Knotless Tissue Control Device Only.

** Sizing shown represents tensile strength. See IFU for additional information.

STRATAFIX™ Spiral Knotless Tissue Control Device: Unidirectional

Provides added consistency and efficiency for skin and subcutaneous tissue where tension has been relieved by deeper closure.¹

- Closure begins at one end of an incision, for a familiar wound-closure technique¹
- Adjustable fixation loop secures the device without the need for tying a knot¹
- Suitable for organ closure when additional tension control is appropriate
- Offers Plus antibacterial technology to address risk factors associated with SSI^{12,13}

STRATAFIX™ Spiral Knotless Tissue Control Device: Bidirectional

Allows for management of tension from the middle for control over tissue approximation in challenging conditions like non-linear incisions and larger open wounds.

- Secured with a backstitch or lateral stitch on both ends to finish
- 360-degree spiral anchor patterns¹
- Bidirectional anchors start in the middle and move toward the needles on each end¹⁰
