

About the Manufacturer

Since 1938, Cincinnati Surgical has been recognized as an industry leader in manufacturing high-quality surgical blades, scalpels, and safety products. Our manufacturing heritage in the United States (1938-1961) and Sheffield, England (1962-Present) has now come under one roof in Sheffield through a historic joint manufacturing agreement with Swann Morton, signed in 2015. By combining our manufacturing capabilities, we've expanded our family of brands and brought the global leader in surgical blade manufacturing to the US market.

From the quality of the steel to our ISO manufacturing standards and visual inspection of each blade, we are able to provide a consistent, zero defect product line that will ensure durability and consistency each time it is used. With our extensive range of products and ability to ship same day, we offer our customers a product they know they can trust when quality counts.

Our number one focus is to produce the highest quality blade available. Because surgical blades are a Class 1 Medical Device they do not require FDA inspections, whether imported or repackaged. This can lead to diminished quality control by some in the industry. But don't worry because "We've Got You Covered" through every step of production. From every batch of steel meeting our strict specifications all the way through to our in-house sterilization process.

The Cincinnati Surgical and Swann Morton Difference

Unique Edge Grinding

Our blades are manufactured with a unique cutting edge design. One side has a smooth razor edge that is supported by a micro serrated edge for a consistently sharp blade.

This grind delivers a tactile sensitivity that improves depth control while providing equal, smooth tissue margins. Many other blades have two razor edges. While initially very sharp, this edge can deteriorate faster.

Straight from the Manufacturer

- A commitment to quality
- Control over the entire manufacturing process
- Premium steel creates a uniform edge for a consistent cutting surface
- ISO certified for Quality, Energy and Environmental Management Systems
- 200% visual inspection resulting in zero defects
- In-house Sterilization
- Featured on the Discovery Channel's "How It's Made"

Carbon steel
provides the best combination of initial sharpness and edge durability, but may stain with a solution wash.

Stainless steel
contains a metal composition that keeps it from staining when used with a solution. Known for its lateral pressure durability.

Dermatology & Mohs Surgery Examples

Swann Morton Blade
Size 10 packaged 100/box
00SM10: sterile, carbon
01SM10: sterile, stainless

Swann Morton Blade
Size 11P packaged 100/box
00SM11P: sterile, carbon
01SM11P: sterile, stainless

(Straight tip)

Swann Morton Blade
Size 15 packaged 100/box
00SM15: sterile, carbon
01SM15: sterile, stainless

(Angled tip)

Swann Morton Blade
Size 15T packaged 100/box
00SM15T: sterile, carbon
01SM15T: sterile, stainless

Swann Morton Blade
Size 15C packaged 100/box
00SM15C: sterile, carbon
01SM15C: sterile, stainless

Product Range

Largest product range available from one manufacturer.

Standard Blades - Specialty Blades

Miniature Blades - Disposable Scalpels

Handles - Safety Products
